

# Super Templates for Windows

**Mike Hanson's Super Templates for Windows boosts Clarion's Application Generation power.** Develop higher quality programs that your clients will pay a premium for. Mike Hanson has been writing models and templates for Clarion since the beginning. His Super Models and Super Templates for DOS have been popular for years. Get exactly the features you need. Mix and match these templates using Clarion's template registry.

**Super Security** - Protection from unauthorized access. With these template enhancements, you can easily restrict access to procedures, add/change/delete/view operations and/or fields. Supports manager override. Use either level or door oriented security. Several security administration procedures are included free for distribution with your programs. such as: automatic prompting for user names, passwords and access updates. Get all this for only \$79. Now shipping!

**Super Tagging** - Batch processing for selected records. Have you ever wanted to create a report or perform a batch process on only some hand selected records? *Super Tagging* tags individual records in a file for later processing by the Report or Process templates. You can Tag, Untag, TagAll, UnTagAll and ToggleAll. Access operations from buttons or Menu selections. Full multi-user support. It even supports multiple tags for a single file for separate operations. Optionally store tags for later use. *Super Tagging* is yours for only \$39. Now shipping!

**Super QBE (Query by Example)** - Easy ad hoc queries. The King of QBE continues his reign with this crown jewel for your template treasure chest. Allow clients to perform ad hoc query operations using regular update forms, or use special query screens. Search one or more files. Use *Super QBE* as a sophisticated records locator. Use up to 13 different search types like equals, not equal, begins, contains, less-than, more-than, in range. Wow! Yours for only \$99. Now Shipping.

**Super Selective Update** - Perform ad hoc field changes to selected records. User chooses the fields to change and the new values at run-time. Assign fields a constant value, or the value of another field. Combine with *Super Tagging* or *Super QBE* for even greater flexibility. *Super Selective Update* is a steal at only \$29. Available third quarter 1995.

**Super Dialer** - Dials a phone from your program by pressing a button. All you need is a modem. *Super Dialer* is only \$29. Available third quarter 1995.

**Super Invoice** - Relational views with in-place batch updates. Have you ever needed a single screen that shows related records such as an invoice? Have you ever wanted to update individual records in a list box without forcing the user to go through an update form? This template enhancement does it all. It's even smart enough to support transaction processing for the entire set. If you have a relational database, you need this template. Get *Super Invoice* for only \$99. Now Shipping.

**Super Browse** - Change browse viewing order easily. Allow your user to change to a different keyed sequence. Use a drop box, radio buttons or a separate dialog to change the key. Supports locators. Supports reverse ordering. Use one browse instead of many. Get smaller executables and simpler operation. *Super Browse* is only \$69. Available third quarter 1995.

**Super Browse Update** - Single file in-place data entry from a browse. Get full add/change/delete/view capability. Each record updates as it's scrolled. *Super Browse Update* is only \$49. Available third quarter 1995.

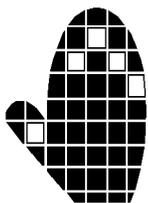

**Super Import/Export** - Copy records from file to file without coding. Archive records to history. Clone all or part of a file. Perform easy file conversions to different layouts or different drivers. Optionally, delete source records after copying. Optionally, empty destination file before copying. Combine with *Super Tagging* or *Super QBE* for even greater flexibility. Do it all without writing code. *Super Import/Export* is yours for only \$29. Available soon.

**Super Limiter** - Limit network access to your program. Control the number of concurrent users on the system. It supports bumping, locks, inactivity time-out, overrides and more. Works on all networks. Get *Super Limiter* for only \$149. Available third quarter 1995.

**Super File Drop** - Access data differently from related fields. This gives you great flexibility in how you access and acquire related information. For example, type an invalidate state code and look up states by name and return the state code. Get *Super File Drop* for only \$29. Available soon.

**Super PassCode** - Protection against software pirates. Forces your users to enter a machine-specific code before they can run the program for the first time. Different codes are available for daily, monthly, yearly and permanent access. Use it to distribute field upgradeable demo copies of your software. *Super PassCode* is only \$149. Available third quarter 1995.

## Powerful Data Dictionary Tool

**Data Dictionary Manager** builds applications faster. Import file definitions into a CDD or CW Data Dictionary easily. You control the default field attributes, prompts and pictures. Perform fast load or be prompted for every item added. Supports DDF's and xBase files, CW to CDD Dictionary conversions and Clarion source code imports. **Create a data dictionary from existing files in seconds, not days!** Free Bonus, create DDF files from your dictionary! Data Dictionary Manager is only \$129 and includes a free Data Dictionary Documenter.

**Data Dictionary Documenter** prints dictionary contents four ways:

- 1) Technical Spec's for end-user and client documentation.
  - 2) Columnar report for consistency checking.
  - 3) Fully-commented source code for internal documentation.
  - 4) Export file for interfaces
- DDD is only \$49

## BarCode Printing

**Super BarCode Printer** prints code 3 of 9, code 2 of 5 or UPC barcodes on any HP LaserJet, Epson FX, or IBM Proprinter or compatible. Useful in point-of-sale, warehousing, library applications and more. More symbologies to come. **Super BarCode Printer** is only \$129. Now available for v3.0 and v2.1. Coming for Windows soon.

## Accounting Source Code

**Accounting3** is written in Clarion's Designer augmented with hand-written, commented source code. It's written by an accountant with excellent computer experience. These modules available today for v2.1: General Ledger, Payroll, Accounts Payable, Order Entry, Inventory & Accounts Receivable. Demos available on our BBS. End user documentation on disk for easy customization. Buy the modules separately, or get all modules and save! Look for Windows modules the first quarter of 1996.

## Generator Tools

**Template Expander** makes CW templates easy to read by expanding template code and creating a cross reference report. You get complete source code to this Windows program. Learn how code many procedures like file lookups and batch processes. Template Expander is only \$29.
