Reporting Bugs

If you find a bug in our software, it would be helpful if you reported the bug to us. To report a bug, please e-mail us with Bug Report Request in the subject line. In your e-mail, include the following information:

What type of PalmPilot you are using (i.e. Personal).

The software name and version number (i.e. Bars 2.10).

The error number and the exact contents of the error message.

A brief description of how we can recreate the error.

Your name and e-mail address so we can contact you when the bug is fixed.

It is best to report bugs by e-mail, so that the programmers have a written record of the information they need to solve the problem. As soon as we receive your e-mail, we will examine the problem, and fix it. Because our programmers are busy creating software, it can take a while for them to reply, but they will release a new version of the software that fixes the bug as soon as they can.

The Goal

The goal of the game is to remove all the bars from the screen You do that by tapping them. A bar must be detached so that you can remove it. If it overlaps with another bar you will not be able to remove it and your tap will be waste of time and a go. Bars pile up in the screen – the higher the level, the faster their speed.
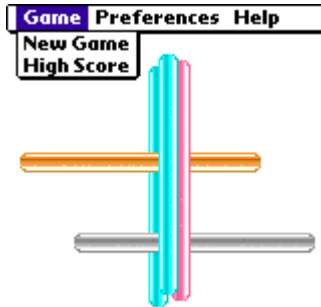

Start – New Game

In the main applications screen of your device, tap the Bars icon. The logo screen will appear.
Start – Choose Your Starting Level

The game begins with Level 1 and then gradually moves you to the next levels. If you wish to start from a higher level you should go to **Menu|Game|New game**

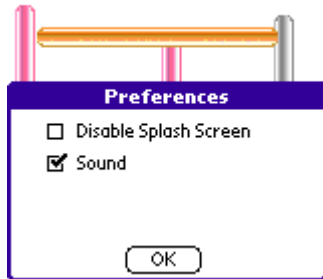

The following screen will appear:

Select the level you wish to start from (if the game is not registered you can choose up to 4 level). Tap **START** to start the game.
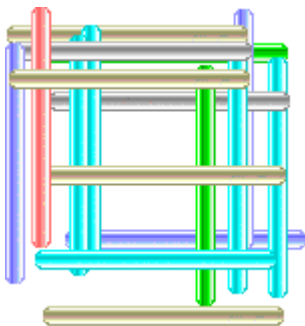

Start – The Sound Option

If you wish to enable the sound option while playing, go to **Menu|Preferences** and tap the check box before Sound. Alternatively, disable this box to play the game in silence.

If you don't want to see the logo every time you start the game, go to **Menu|Preferences** and check the **Disable Splash Screen** box (you can do that only if the game is registered).

Play Bars

Each level of the game begins with a number of color bars piled in the screen. You have to quickly remove them by tapping them. The faster you do that the better your time will be and the greater your chances to enter the High Scores Board.

Levels

Bars has12 levels. The number of bars and the speed at which they fill in the screen increase as the levels ascend.

Scoring

Your score depends on the time for which you will manage to complete the level. The following screen will appear when you finish th game.

Enter your name in the space provided and tap **OK** to continue.

If you want to copy the **Bars** from one Palm device to another you must choose the option **Beam to a friend** from **Menu |Game | Beam to a friend.**

High Scores

Once you have recorded your score the High Scores Board will appear. You can see here the best score recorded for each of the levels.

View Your Scores

To view your scores go to **Menu|Game|High Scores**.

Help

Bars offers some simplified internal help. You can find there some basic information of the rules of the game and its final goal.
To view these helpful tips go to **Menu|Help|Help**. The following screen will appear:

Tap **Done** to quit the screen.

The End
