About New Year Slots

New Year Slots is part of a series of seasonal/holiday slot games published by Ultisoft, Inc. Halloween and Christmas Slots are also available and others will be released soon.

This is a one payline slot machine game. Up to five coins can be bet on each spin. Winnings are based on the symbols on the payline. A payline is only active if there is a coin bet on it. A rocket up or down feature is also built into the game to increase your odds of a win. There are also several bonus features which make New Year Slots very fun and also adds an element of skill to the game.

The game will detect the number of colors available and will use either True Color (24-bit) graphics or 256 color (8-bit) graphics depending on your graphics card's capabilities. The game will also adjust to your current resolution and will take up the full screen.

Please send comments, suggestions and bug reports to support@ultisoft.com

Keyboard Controls

Besides using your mouse to control the game, you can use your keyboard for betting and for spinning or stopping the reels

To Bet one Coin: Press B

To Bet max Coins: Press M

To Spin: Press the Enter Key or the Space Bar

Placing Bets

Click the "Bet 1" or "Bet 5" buttons to place your bet. You can also press the "B" or "M" buttons to place bets. Click the "Spin" button to spin (or hit the "Enter" key or "Space Bar"). You can continue to bet the same amount by just spinning.

Borrowing Credits

Click on the Borrow button to borrow (or repay) credits. A new game starts with 1000 credits which are considered borrowed.

Payoffs Chart

Click the PAYOFFS menu item within the program to view the payoff chart. The payoff chart lists the amounts won for various winning paylines and bonuses.

Remember that payline winnings are based on one coin bet. If you bet three coins, the payoffs would be tripled.

Bonuses

Pick a Letter

There is a bonus game in New Year Slots. You get to the bonus game when the time line on the right side of the game screen becomes fully lit. You light the 12 parts of the time line by collecting points which appear on some of the slot symbols. These range from one to three points. For every point collected, another hour on the time line is lit. Only symbols which appear on the active payline count. Below is an example of a symbol with a point on it.

You lose all your collected points if you get a slot symbol with an "X" on it (see below). When this happens, your time line will become completely unlit, and you must start over in your efforts to go to the bonus game.

Loading and Saving Games

You can save a game at any time by clicking the **SAVE GAME** button. You will be able to name your game anything you like up to 30 characters.

You can then load any of your saved games by clicking the **LOAD GAME** button.

Your current game is saved automatically when you exit the game. When you run the game later, your last game will be loaded automatically.
