## 1.2 features

```
        1. First

      Welcome
      ......................... Let´s say hello
```

## 1.3  welcome

Welcome to FANTASTIC.WB+

Hi, here is my first release of FANTASTIC.WB+ (short F.WB+).
It´s another icon / images / ... collection in style of Magic.WB.
Look at them and if you like it use them.

```
Don´t wonder if you see some same images like Magic.WB, i include some  ←
    cut´n´paste
artwork from ROMICONS and Magic.WB and other M.WB-collections,
but i repixeled the most of them into a true 16 color WB.
(color definition by ROMAN PATZNER)

If you
I hope you enjoy my little artwork – if yes don´t press the following Buttons
```

## 1.4   Font Background Information

```
Background Information about the Fonts

In this version i include 3 Fonts RSANS, RSERIF, RSANSSERIF.

RSANS (sizes 13,15,19,24)   (orig.: sw_Sans)
 – This Font looks nice on Menu-items or other "normaly" text.

RSERIF (sizes 13,15,19,24)   (orig.: sw_Serif)
 – This Font looks nice for Title-settings etc. (it´s an really Serif-Font)

RSANSSERIF (sizes 7,8,9,11,13)   (orig.: SansSerif)
 – This Fonts looks pretty good at some Icons textings.
    (it´s not really an Serif-Font)

This Fonts are not originally drawn by me – I only repixeled some faults on
this Fonts.
I think the fonts looks pretty good on every Magic.WB collection.

(I´m not finished to repixeled all Fontstyles jet – but i´m on work)
 There are no features symbols for control chars (like ‘form feed‘ or ‘escape‘)
 tell me if you want they!

-> Look at the Fonts <–
```

## 1.5   do you have the correct Colors installed?

```
The Icons look very twise???

If you´re Icons look twise – then follow some hints....

Steps to install them on your system:

 1. Change your screenmode to 16 colors.

 2. Load the User-Startup into your editor and change the MagicWB-Daemon to:
    Run >NIL: C:MagicWB-Demon 4,123,123,123 5,175,175,175 6,170,144,124
             7,255,169,151 8,0,0,255 9,40,62,91 10,96,128,96 11,226,209,119
 3. Do the same with your Startup-Sequence

 4. Load Prefs/Palette and change the last four colors to 255,212,203;
    122,96,72; 210,210,210; 229,93,93
```

Hey you have the ROM-Color installed but the Color 9 isn´t right?

You have the wrong color 9 definition (like 50,50,50) well change this part at
your Startup-Sequence (to 40,62,91)

Roman will do the change too! at one of the next Versions.

## 1.6   Icons Background Information

Background Information about the Icons

There are some differences about my Icon-Styles with other Magic.WB-Styles:

All Icons have (/are) ...

    ...  saved  at 4-bitplanes (16 Colors),
    ...  an other Gradient filling Style (light Brown to Background Grey)
         the Gradient look like a style of ROMICON-Set, but it was drawn by PPaint ←
          .
    ...  a 4-point corner edge (at the right top and at the left botton corner),
    ...  a different size as Magic.WB-Icons,
    ...  a grey Line on the right and the botton corner,
    ...  the grey (standart) Gradient as the background (XEN only have an dark  ←
      grey Line).

      -  i found now, they have more liftin up 3d/plastic look.

     -> Look the difference Styles <-

supplement special Icons have ...

    ... an animated Image at the left top.

     -> Look the difference special Styles <-

last: Don´t be afraid if see in some Repixeled Icons-Datatypes the text »» Icon © ←
     by RangeWire (R.E.S) ««

## 1.7   Brush Background Information

Background Information about the Brush´s

I redraw (repixeled) all Magic.WB brushs into the 16 Color format, many of them
are originally drawn by Walter Dörwald (Magic.WB).

My Brush Template has the same size like the Magic.WB brushs, they are saved with
4-bitplanes and the edge corner has some difference like my Icons

(but they are fully compatible to use with the originally brush´s).

-> Look the difference <-

## 1.8 This is CARDWARE!

                    Cardware

If you like and use some of my icons, TM-brushes etc. you´ll have to send me
a postcard with a picture of your hometown. (nice idea from Roman)

                    Click here
                     for my address.

If you are not going to appreciate my work by sending me a postcard I will
have to finish my thesis instead of creating new icons/images/etc. ...

## 1.9 How to contact me

to contact me (maybe to draw with me some stuff)

Don´t click here if you are poor

## 1.10 About MagicWB v2.0

                         MagicWB v2.0
                         ============

The definitive WB-Enhancer no Amiga can do without. MagicWB is a full
replacement for the graphic user interface of the Workbench and has become
the standard on the Amiga.
MagicWB 2.0 is completely restructured on a new color-allocation scheme which
more than doubles the speed of the WB and reduces chip-consumption to only a
third compared with all previous versions and also features a highly improved
color palette. MWB 2.0 introduces a never-before-seen standard for over four
dozen of new image-drawers to achieve a more diversified look on your WB.
More icons, dock-brushes, a dozen of new patterns, fonts and a AA-support

complete this special product.

To get the 'real' look and feel of MagicWB, you should make sure that...

* ...you have set the MagicWB-Palette. Do this by clicking on the 'ClickFor
     Colors' icon.

* ...you have set the resolution of your Workbench to a aspect ratio near 3:4
     like 640x480, 800x600 or 1024x768.

The demo-version can be found on Aminet biz/demo/MagicWB20d.lha.

MagicWB is © by Martin Huttenloher.

## 1.11   About ROMICONS

```
                        ROMICONS
                        -=========-
```

ROMIcons are at time the greates Artwork about Magic.WB.
For more information look at the ROMIcons and see the autor-information.

He give´s me the ok to cut´n´paste some images from his great Icons Set´s
and placed them to my archive.

Show also at his ROMICONS / ROMIMAGES / ROMPIX on Aminet. they are the finest you
can see for Magic.WB-contents

ROMICON / ROMIMAGES / ROMPIX is © by Roman Patzner

## 1.12   whats included...

Version: 1.0   - INITIAL & FIRST RELEASE -
