expressed or implied. By using it, you agree to accept the entire risk as
to the quality and performance of the program.

Comments, suggestions and bug reports are welcome. See
              The author
          .

1.3 Introduction

ACTool is a program for integer convertion between :

 – Decimal/Octal/Binary/Hexadecimal

 and

 – Decimal/Octal/Binary/Hexadecimal

ACTool have a GUI interface and is compatible OS 1.3/2.x/3.x.
ACTool should run on every system.

ACTool is written using IObject.lib from Christophe Passuello which
emulate some of the gadget of the gadtools.library.
IObject.lib is © Christophe Passuello 1993.

ACTool is very easy to use, so just try it and you will understand how
it works.

ACTool have both english and french interface. See
                 Usage
                   .

1.4 Usage

ACTool can be start from CLI or Workbench.
 All options are case insensitive.

CLI usage

Workbench usage

1.5 CLI usage

    Usage: ACTool [?]
           ACTool <number> <base> ...

    option :

    ?   : print usage.

```
<number>    : input number.

    789 -> decimal number
    @45 -> octal number
    %11 -> binary number
    $2b -> hexadecimal number

<base>      : output base.

    dec | d    : decimal
    oct | o    : octal
    bin | b    : binary
    hex | h    : hexadecimal
```

```
Examples:

 - convert hexadecimal number 'ff' to decimal

     ACTool $ff dec
     $ff = 255

 - convert hexadecimal number 'ff' to binary and decimal number '255'
   to hexadecimal

     ACTool $ff b 255 hex
     $ff = 11111111
     255 = ff
```

1.6 Workbench usage

```
Just double-click on its icon.

By default ACTool starts in english mode.

  Tooltypes:

      LANGAGE=francais        : french mode.
```
