DAYTONA USA ™

Note!

Note:
Do not load the installation program while playing the game.

Note:
To play DAYTONA USA, your peripheral devices must all be compatible with DIRECT X2.

Note:
Your screen must be set to 16-bit color when playing DAYTONA USA.

Note:
Do not operate the Install Program function when playing the game.

Note:
The Help File screens are still under construction.

Note:
You need an nV compatible board if you want to use the Saturn Control Pad or
Saturn Racing Controller. If you don't have an nV compatible board, you can
use your keyboard or a PC pad to play the game.

DAYTONA ™ USA

...And You're Under Way!

You rank 28th in a pack of 40 surging, screaming machines, all vying for the lead position. Just ahead and to your left, Car 16 takes a glancing hit from behind and spins wildly. You dodge just in time to avoid a pileup, but two other drivers aren't so lucky.... With seven laps to go, you downshift just before the entrance to the hairpin before the Start/Finish line, but you've come in too fast. Tires scream as the g-forces pull your car to the right, and the wall looms close. All you can do is hang on and pray that you squeeze by-at 200 miles and hour, kissing the wall is not something you want to do....

Daytona_ USA brings the excitement of stock car racing action from the arcade to the armchair! Play the Arcade version of the game, or check out the extra options in Sega's special Saturn Mode.

Strap yourself in behind the controls, and get ready to race!
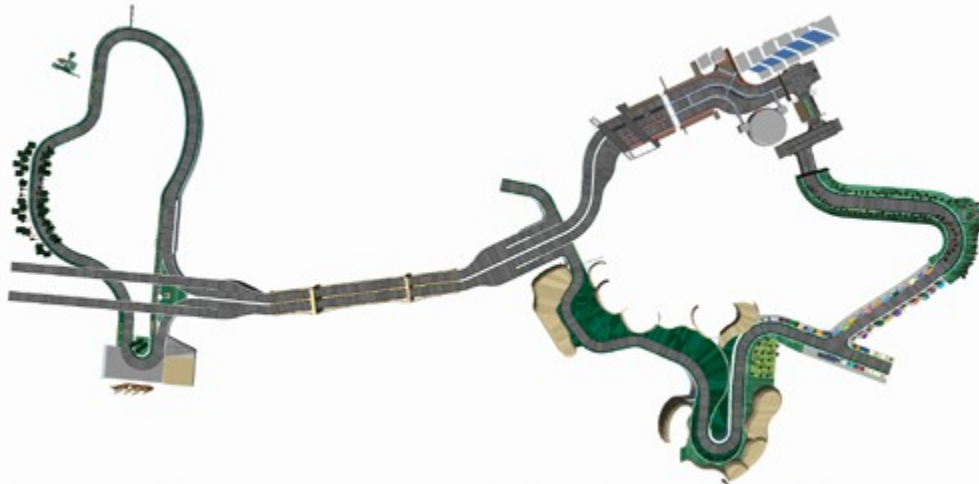

Circuit Description

Beginner

This is a smooth, fast course that can be driven mostly at flat-out speeds. The final hairpin before the Start/Finish line can make or break your race. This is also the only course where you begin the race from a rolling start. Fight your way from last place to first!

Advanced

Rolling terrain, high walls and a long tunnel reduce the visibility of this course and make the sharpness of the turns less predictable. Pre-race practice is recommended.

 Expert

Converted from city streets and highways, this course takes on a whole new dimension when racing. Sharp hairpin curves, varied course widths and low visibility make competing on this circuit a real challenge.

The Starting Line (Starting the Game)

Press the Skip Button2jump_new in the Title Screen to access the Mode Select Screen. Choose modes with the Selection Button, and confirm with the Confirmation Button or the Skip Button.

Game Modes

Arcade Mode

Play the Daytona USA game straight from the arcades! Choose one of three courses and one of two cars. A Time Attack Mode is available. Please see <u>Arcade Mode for details</u>.

PC Mode

Play the special PC version with extra options! Choose one of three courses and one of four cars. A Time Attack Mode is available as well as a special Mirror Mode.
Please see <u>PC Mode for details</u>.

Ranking Mode

See the top times for each mode, course and type of transmission. Please see <u>Ranking Mode for details</u>.

Arcade Mode

In Arcade Mode, you race both against your rivals and against the clock. You start the race with an allotted number of seconds on the timer, and receive extra time (the amount depending on the race and course chosen) each time you pass beneath a Checkpoint. If your time runs out before you pass beneath a Checkpoint of the Start/Finish line, the game ends.

Select Arcade on the Mode Select Screen to access the Arcade Mode. Both the standard mode and a special Time Attack Mode are available.

Circuit Select Screen

The Circuit Select Screen appears next. Choose one of three courses: Beginner, Intermediate, or Expert.

Mission Select Screen

Once you select a course, the Mission Select Screen appears. Choose from two types of car: Automatic or four-speed Manual.

Time attack

From the Mission Select Screen, hold the Skip Button2 while making your selections to access the Time Attack Mode.

PC Mode

The new PC Mode eliminates the countdown timer, gives you a wider selection of cars to choose from and offers a special Mirror Mode for each course.

Circuit Select Screen

The Circuit Select Screen appears when you select the PC Mode. Choose one of three courses: Beginner, Intermediate, or Expert.

Mission Select Screen

After you select a course, the Mission Select Screen appears. Choose one of four different cars. Above average performance in a race in Hard mode will reward you with extra choices....

Ranking Mode

View the top racing times for each game mode and course. Select a game mode by pressing the Selection Button UP or DOWN, and select a course within that mode by pressing LEFT or RIGHT. Access the rankings for the selected mode and course by pressing the Skip or Confirm Button.

Scroll through the rankings by pressing the Selection Button UP or DOWN. Return to the Ranking Selection Screen by pressing the Skip Button or Confirm Button. To go from the Ranking Selection Screen to the Mode Select Screen, select EXIT and press the Confirm Button.

Circuit Select Screen

Arcade Mode, PC Mode: Select the Beginner, Intermediate or Expert course by pressing the <u>Selection Button</u> LEFT or RIGHT. To choose the course, press the <u>Confirm Button</u> before the countdown reaches zero. (When the countdown reaches zero, the highlighted course will be selected and you automatically go to the Mission Select Screen. To cancel course selections and return to the Title screen, press the <u>Cancel Button</u>.

Circuit Description

In PC Mode access the Mirror Mode feature by holding the <u>Skip Button2</u> while choosing your course.

Mission Select Screen

Arcade Mode: Choose the type of transmission you want to use. Press the <u>Selection Button</u> LEFT or RIGHT to select an Automatic or 4-speed Manual transmission. Choose by pressing the <u>Confirm Button</u> before the countdown reaches zero. (When the countdown reaches zero, the highlighted transmission is selected and the game begins.) To access the Time Attack Mode, hold the <u>Skip Button2</u> while choosing your transmission.

Cancel your choices and return to the Circuit Select Screen by pressing the <u>Cancel Button</u>.

PC Mode: Choose one of four different cars before the timer runs out. To access the Time Attack Mode, hold the <u>Skip Button2</u> while choosing your car.
Return to the <u>Circuit Select Screen</u> by pressing the <u>Cancel Button</u>.

Time Attack

Use Time Attack Mode to practice your driving techniques, familiarize yourself with a course, or try for a lap record. In Arcade Mode, you can compete with the countdown as well just you against the timer!

Select either Arcade or PC Mode and choose a circuit. When the Mission Select screen appears, press and hold the Skip Button2.

A stopwatch icon appears above the course at the bottom of the screen. While holding the Skip Button2, press the Confirm Button to select your car/transmission and enter the Time Attack Mode.

Options Screen

Change the game settings and sample the music used in the game. In the Options screen, press the <u>Selection Button</u> UP or DOWN to choose an option, and LEFT or RIGHT to alter features within the option.

Game Mode: Alter the number of laps of each race, depending on the length of the course chosen.

Mode	Beginner	Advanced	Expert
Normal	8 laps	4 laps	2 laps
Grand Prix	20 laps	10 laps	5 laps
Endurance	80 laps	40 laps	20 laps

Difficulty: Select a difficulty level. The harder the game, the fewer seconds you get to complete a race in Arcade Mode.

Enemy Level: How fast do you want your competitors to be? Choose from VERY EASY to VERY HARD.

Music Test and Sound Test: Sample the music and sound effects used in Daytona USA. Press the <u>Selection Button</u> LEFT or RIGHT to select a track. Press the <u>Confirm Button</u> to play the music or sound effect.

Key Assign: Configure your game controls. To enter the Key Configuration screen, select KEY ASSIGN and press the <u>Confirm Button</u>. Press the <u>Selection Button</u> LEFT or RIGHT to cycle through the four preset Control Pad Settings (Type A is default), and press the <u>Confirm Button</u> to select and return to the Option screen.

To customize your game controls, press the D-Pad LEFT or RIGHT until EDIT appears on screen, then press Start. All of the control labels will begin to blink.

Press the button on the Control Pad that you want to change, and the label for that button will begin to blink. Press the Selection Button LEFT or RIGHT to cycle through the available functions and select the one you want. Then choose OK or CANCEL and press the Skip Button.

Repeating a Race

Don't think you'll make it to the Finish line? You can quit a race and repeat it if you wish.

 Keyboard or PC Pad

Press [Enter] key . While the game is paused, press [R] key.

 Sega Saturn Control Pad or Sega Saturn Arcade Racer

Press the start button. While the game is paused, press the [X button],[Y button] and [Z button] simultaneously.

5-0 The Finish Line

Entering Your Initials

The times and initials of the top 20 drivers appear on the Ranking and Title screens. There are two ways to get your name listed: by scoring the fastest overall time or the fastest single lap. You don't have to finish a race to make a fastest lap. If you made both a fastest lap and a fastest overall time, you only enter your initials once they appear on both records.

If you burned in a record-setting time, the Enter Initials screen appears after you finish your race. Press the <u>Selection Button</u> LEFT or RIGHT to cycle through the letters, and press the <u>Confirm Button</u> to enter a letter in the first space and continue to the next. To go back a space, press the <u>Cancel Button</u>, or select the arrow and press the <u>Confirm Button</u>.

Exit the Enter Initials screen by pressing the <u>Skip Button</u>, by making entries in all three spaces, or by selecting END and pressing the <u>Confirm Button</u>.

Tips from the Top Three

 Control, rather than flat-out speed, gives you the fastest lap times.

 Hitting or rubbing against the wall robs you of precious seconds more than anything else.

Keep your car moving in a uniform direction, with smooth, even lange changes and turns. Watch the other cars at first and learn the best places to enter and exit each corner.

Take advantage of the Time Attack Mode to familiarize yourself with every aspect of a circuit.

If you are using a Sega Saturn Control Pad or PC Pad, keep a light touch on the D-Pad. Unnecessary swerving costs valuable time, and if you're using a manual transmission, you increase your chances of shifting into the wrong gear by accidentally pressing the D-Pad UP or DOWN.

The Menu and Removing the Software

Using the Menu and Removing the Software

The following are directions on how to use the Menu and how to uninstall the game. **Press F10 to bring up the menu bar**.

 Menu

In the Menu bar you'll find three sub menus: Game, Option and Help. Click on these menus for the following:

Game: Lets you start or quit a game. See **Game Details**.

Option: Lets you change game options. See **Option Details**.

Help: Click HELP to bring up a pull-down menu leading to the Help File.See   **How to Use Help**.

 Software Removal

Click REMOVE on the Install screen, or uninstall from the system.

Note:
Do not load the installation program while playing the game.

Game Details

Click GAME during gameplay to see the following:

Restart Game... (Alt + R)
   Start the game from the beginning.

Exit Game... (Alt + F4)
   Quit the game.

Option Details

From the Menu bar, click OPTION to see the following:

Change Control:

Allows you to select input devices and assign key and button functions. Select the input device you wish to use from among any compatible devices currently connected to your PC. To calibrate an analog input device, select JOYSTICK from the Control Panel.

Change Display Mode:

Set the screen output to high- or low-resolution. If the game seems to be moving slowly, try playing in low-resolution. (This will only have an effect if your board and driver are Direct X2 compatible.)

Change Disp Size:

Change the size of the game screen. Choosing a smaller screen increases the speed of the game. (This is only effective if the display is set to high-resolution.)

Clip Size:

Choose from three levels of visibility NORMAL, WIDE or VAST. The higher visiblity levels may slow the game down.

Motion:

Choose SMOOTH or ROUGH for the game motion. SMOOTH motion may slow the game down. ROUGH motion will make the game run faster, but the action will appear jerkier.

Background Display:

Switch the background display ON or OFF. If the game seems to be running too slowly, try playing with the background display switched OFF.

See Through:

Allows you to choose PolyLine for the background display. You can increase the game speed by choosing PolyLine and switching the background display OFF.

How to Use Help

Clicking on Help in the Menu brings up a pull down menu with a list of options. Click on the option you want information about.
You can also call up the Help feature by pressing F3.

Key pop-up window

Clicking on the words underlined with a green dotted line brings up the following peripheral assign options in the form of pop-up menus:

Keyboard
PC Pad
Sega Saturn Control Pad
Sega Saturn Arcade Racer

Hotline

If you should encounter any problems of this game please refer to the warranty card found within the package, or to the package itself. We cannot respond to any inquires regarding game play, hints or tips.
Sega disclaims all responsibilities in this CD-ROM hardware and contents of the game.

Are you enjoyed Daytona USA?
See you again next game!

THANK YOU FOR PLAYING.
SEE YOU AGAIN NEXT GAME.

We already started preparing another surprise for you.
Get ready!

I love N. Y.

My work is "testing" a new PC GAME.
At first, I'm very spirited to exciting the GAME.
But now, I'm very tired and sleepy.

Please, you should rest your eyes at 60 minite intervals from GAME PLAY.

I'm very tired now.

Mission complete.

I love you!!!

Did you enjoy daytona ?

```
              _____
         ___/___|__|___
        |    _      1 |       _      |
        --|_| -------    |_|-   ))))))
```

HAVE FUN!!

Have a great fun with Daytona USA on PC!!!

My "Lupin" and "Hannya" is cheerful.
How's your family?

I'm dying from overwork!!!

"But not dead, aren't you? "-Producer

Don't **click** me!
I'm speeping now!

Speedy and colorful game Daytona allowed you to change the window size you want. Did you know it?

Far Out!

Safety Drive.

Neo Bikiers

Girls, be ambitious!

Let's fan!

Speed, speed, speed!!

DAYTONA USA, the Ultimate Motorsports Attraction, is now open at Daytona International Speedway in Daytona Beach, FL.
Come and see it!

This setup program is my **debut** product.

Hi, I am the main programmer of   installers of Sega PC titles.

I would be very happy if you liked the game and will play other **great** Sega PC games as well!
