System Requirements xii

Use of This Manual xiii

Manual Contents xiii

Form of Presentation xiv

Chapter 1 Starting and Quitting NCSA Telnet

Chapter Overview 1.1

Starting the Program 1.1

Using the Help Screen 1.2

Quitting NCSA Telnet 1.2

Chapter 2 Introduction to Managing Sessions

Chapter Overview 2.1

Keyboard Usage 2.1

Multiple Sessions 2.2

Opening Multiple Initial Sessions 2.2

Using the Status Line 2.2

Opening Additional Sessions 2.2

Indicating the Host 2.2

Estimating the Host Response Time 2.3
Using Scrollback Mode 2.3
Using the Cut and Paste Functions 2.4
Switching Between Sessions (ALT-N) 2.4
Displaying Console Messages (ALT-Z) 2.5
Exiting the Present Connection (ALT-X) 2.5
Capture File Operations 2.5
Designating a Capture File 2.5
Using PRN 2.5
Using One Capture at a Time 2.6

Chapter 3 More About Managing Sessions

Chapter Overview 3.1
Keyboard Commands 3.1
Using the Skip Command (ALT-S) 3.1
Resetting the VT100 Screen (ALT-R) 3.1
Aborting the Program (CTRL-ALT-F3) 3.1
Escaping to DOS Shell (ALT-E) 3.1
Parameter Menu 3.2
Using Screen Text Colors 3.4
Using Remote Echo and Local Echo 3.4
Using the Backspace Key 3.5
Changing the Session Name 3.5
Changing the Terminal Type 3.5
Using Line Wrapping 3.6
Using Output Mapping 3.6
Changing the Capture Filename 3.6

Using Screen Mode 3.6

Using File Transfer Mode 3.6

Using Clock Mode 3.6

Chapter 4 Utility Programs

Chapter Overview 4.1

finger 4.1

Name 4.1

Command Line 4.1

Description 4.1

Options 4.2

ftp 4.3

Name 4.3

Command Line 4.3

Description 4.3

Options 4.3

Commands 4.4

Aborting a File Transfer 4.10

File Naming Conventions 4.10

File Transfer Parameters 4.10

lpq 4.11

Name 4.11

Command Line 4.11

Description 4.11

Options 4.11

Diagnostics 4.12

lpr 4.13

Name 4.13

Command Line 4.13

Description 4.13
Options 4.13
Diagnostics 4.16
lprm 4.16
Name 4.16
Command Line 4.16
Description 4.16
Options 4.17
Diagnostics 4.17
net14 4.17
Name 4.17
Command Line 4.17
Usage 4.18
Options 4.18
rsh 4.18
Name 4.18
Command Line 4.18
Description 4.18
setclock 4.20
Name 4.20
Command Line 4.20
Description 4.20
Options 4.20

Chapter 5 File Transfer

Chapter Overview 5.1
File Transfer Terminology 5.1

File Transfer Guidelines 5.2

Full Path Specification: Conversion of Forward Slashes 5.2

Simultaneous Activity 5.2

Rules for Filenames Sent to the PC 5.2

File Transfer Reports 5.3

File Transfer Using FTP 5.3

Setting Up FTP 5.4

Using FTP 5.4

Invoking FTP on the Host Computer 5.4

Invoking FTP Using Alternate Methods 5.5

Using FTP Commands 5.5

File Transfer Using rcp 5.8

Setting UP rcp 5.8

Using rcp 5.9

Avoiding Use NCSA Telnet's rcp Server 5.9

Using rcp Between the PC and UNIX 5.9

Using Wildcards 5.10

Chapter 6 Tektronix 4014 Graphics

Chapter Overview 6.1

Emulating a Tektronix 4014 Graphics Terminal 6.1

Initializing a Plotter 6.1

Setting the Configuration File 6.1

Switching to and from Graphics Mode 6.2

Graphics Mode 6.2

Text Mode 6.2

Using the Graphics Menu (ALT-G) 6.2

Writing Graphics Files to Disk 6.3

Renaming Graphics Output Files 6.3

Setting the Viewing Region (Zoom Factor) 6.3

Redrawing Last Image 6.4

Plotting a Stored File 6.4

Chapter 7 Installation and Configuration

Chapter Overview 7.1

Installing the Distribution Files 7.1

Sample Configuration 7.1

Required Configuration Information 7.2

The TELNET.BAT File 7.3

Command Line Options 7.3

The Configuration File 7.4

Overview 7.4

Syntax for Entries 7.5

PC Information Entries 7.5

Host-Specific Parameters 7.10

Conversion of UNIX /etc/hosts Files 7.14

Hardware Options 7.14

Combined Ethernet Drivers 7.14

Performance Tuning 7.15

RARP for Dynamic IP Address Assignment 7.16

BOOTP for Dynamic IP Address Assignment 7.16

Appletalk Hardware 7.16

Interrupts 7.17

Domain Name Lookup 7.17

FTP Password Protection 7.18

Compatibility Notes 7.19

Ping 7.19

VT102 7.19

FTP 7.19

Terminate and Stay Resident (TSR) Programs 7.19

NCSA Telnet 7.19

Limitations 7.20

Appendix **A** Error Conditions

Appendix **B** NCSA Telnet Command Reference

Appendix **C** Configuration File Summary

Local Configuration C.1

Host-Specific Parameters C.3

Appendix **D** FTPBIN Command Reference

Appendix **E** Key-mapping

Overview E.1

Copyright Information E.1

Kermit Verb Usage E.1

Set Key E.2

Syntax E.2

Uses of Set Key E.2

Kermit Action Verbs E.3
