
Appendix **B** NCSA Telnet Command Reference

This appendix describes what happens when you enter different keyboard commands during a NCSA Telnet session.

<u>Key(s)</u>	<u>Action</u>
ALT-A	adds a session.
ALT-B	takes you back a session (in the list of sessions you have opened).
ALT-C	toggles capture file on and off.
ALT-D	dumps the current screen into the capture file.
ALT-E	escapes to a DOS shell.
ALT-F	starts file transfer as if typed: ftp [internet address].
ALT-G	displays the Graphics menu.
ALT-H	displays the Help screen.
ALT-I	sends the internet address to the host.
ALT-K	erases a character.
ALT-N	takes you to the next session (in the list of sessions you have open).
ALT-O	aborts output.
ALT-P	changes a parameter; one of: color, capture file name, backspace, session name, screen mode, etc.
ALT-Q	sends the query, Are you there?
ALT-R	resets the VT100 screen.
ALT-S	skips scroll and jumps ahead.
ALT-U	erases the line.
ALT-V	copies text from clipboard onto the current session.

<u>Key(s)</u>	<u>Action</u>
ALT-W	sends your password when you're FTPing back to your PC.
ALT-X	closes the connection.
ALT-Y	interrupts the process.
ALT-Z	displays the Message screen.
CTRL-HOME	clears/enters graphics mode.
CTRL-SHIFT-F3	aborts NCSA Telnet completely. Use of this command is strongly discouraged
HOME	exits graphics mode.
SCR LOCK	pauses/restarts the screen (do not use CTRL-NUM LOCK)
SCR LOCK	enters/exits the scrollbar mode

The following keys allow you to move around the screen while you're in Scroll Lock mode:

- arrow keys (up, down, left, and right)
- PageUp/PageDown (moves up and down by page)
- Home (moves to the beginning of the scrollbar buffer)
- End (moves to the end of the scrollbar buffer)
