```

1.2 Disk Contents

The OctaMED distribution consists of two disks:

```
Disk 1: OctaMED Installation Disk
Disk 2: OctaMED Supplementary Disk
```

The contents of general interest are:

Disk 1:

```
ReadMe.guide   This file.
Changes        New features in V6.
Install-OctaMED OctaMED installation script (see Installation).
XPKGuide (dir) An AmigaGuide front-end supporting packed files.
```

After the initial installation, the Installation Disk isn't usually required, unless you want to re-install OctaMED. However, the Changes file and XPKGuide documentation are not copied by the installation procedure, you will have to access them off the installation disk.

Disk 2:

OctaMEDPlayer (dir)

A freely distributable OctaMED player program, and its documentation.

Demos (dir)

Some demonstration music.

Libs (dir)

medplayer.library and octaplayer.library
Some third-party programs may require these libraries.

Programmers (dir)

Player sources and documentation for programmers.
Be sure to read "ReadMe.doc" first!

Extras (dir)

Contains:

OCTAMED_AREXX.doc OctaMED's ARexx documentation

Rexx (dir)

A couple of ARexx scripts written by Ed Wiles. They may be useful both as such and as examples.

Keyboard (dir)

Some useful keyboard shortcut collections that you may want to use:

PadI1/PadI2.keyboard Alternative numeric keypad configurations for changing instruments.

PadT1/PadT2.keyboard Alternative numeric keypad configurations for turning tracks on/off.

PTKeys.keyboard Emulates some keyboard functions of Protracker.

OctaMEDPro.lamigakeyboard

Defines Left-Amiga shortcuts for menu items not having a Right-Amiga shortcut. (By Ed Wiles)

OctaMEDPro.returnkeyboard

Makes the Return key close windows. (By Ed Wiles)

The installation script copies the entire contents or selected parts of Disk 2 to your hard disk, if desired. Non-bootable floppy installation copies directories Extras/Keyboard and Extras/Rexx. The rest of the files will have to be accessed directly off the disk.

1.3 Compatibility

OctaMED requires operating system 2.04 or later, but OctaMEDPlayer and executable modules saved by OctaMED, still only require Kickstart/WB 1.2 or higher to run, thus allowing you to pass on your PD music (along with the OctaMEDPlayer itself) to others that may still be using an older Amiga®. (Note that the OctaMEDPlayer is the ONLY part of this disk that is freely distributable).

OctaMED and OctaMEDPlayer support the AmigaGuide® system to provide on-line help, allowing you to press HELP at any time to get a complete manual in hypertext format. Use the guide via OctaMED, by pressing the HELP key whilst the prog is running. No commercial printing of the docs is allowed by law, they may be printed out for the purchaser's personal use only, they may not be passed on. Printing any portion of the on disk help or "OctaMED Companion" IS illegal and any Company wishing to do so must first apply for a licence.

OctaMED uses the following disk-based operating system libraries:

amigaguide.library® (optional), but required to use the on-line help.

Available on WB 3.0 or later, but for WB 2 users an older version is provided in the LIBS directory.

asl.library (obligatory)

diskfont.library (optional, required for font support)

iffparse.library (optional, required for loading IFF samples)

lh.library (optional), great compression, licenced with author (Olaf Barthel).

powerpacker.library (optional), needed for crunching etc, it is available on this disk. Licenced with author (Nico François).

reqtools.library (optional, if ReqTools requesters desired)

xpkmaster.library (optional, required for XPK support, not included with OctaMED)

(Amigaguide® and wb 2.1 files are used under licence with Commodore)

Besides AmigaGuide, the following programs may be optionally used as OctaMED's hypertext display program:

Hyper© .guide reader, reads PowerPacked .guide files.

Hyper, from version 1.19b is copyright RBF Software and may not be used within commercial/sharware/licenceware, without obtaining a licence.

XPKGuide v1.6 .guide reader, reads PowerPacked .guide files.

The author of XPKGuide is Simon Dick and he has very kindly given specific permission to include his program for use within OctaMED (why not e-mail him on sidick@essex.ac.uk and say hello).

One final thing..., we have found that depending on where your 1200 was assembled, (don't ask us why!), the Chord function does not work on that particular A1200 keyboard, (works fine all the others, including the 4000's!), so if you are using an A1200 and this function fails to work, then you will have to insert your chords manually, don't blame us!!

1.4 MED USERS GROUP

If you haven't yet joined the MED Users Group (or MUG for short), we strongly recommend that you do! This non-profit making group offers a great deal of help and very friendly guidance on OctaMED. By joining you will receive lots of OctaMED info, songs, help, etc, etc.

Write to MUG, 6 Glevum Road, Stratton St. Margaret, Swindon, Wilts. SN3 4AF
Ask for details of membership, stating that you have OctaMED version 6

PLEASE..enclose an S.A.E or IRC coupon for your reply!!

By the way, the Med User Group is run in association with the OctaMED User Support BBS, so if you have a modem, why not give us a call on: +44 (0)1703 703446 and join in the fun.

BBS opening times: On line from 10am to 2am 7 Days a week

1.5 Installation

You can't run OctaMED directly from the distribution disk. It must always be installed to suit your Amiga configuration. The provided Install-OctaMED script will take care of the installation automatically. You have three different installation options:

- 1) Bootable disk
- 2) Non-bootable disk (requires booting from the Workbench disk)
- 3) Hard disk installation

In cases 1 and 2 make sure you have a blank disk (may be unformatted) and a standard Workbench disk available.

In order to install OctaMED Version 6, just click the Install-OctaMED icon and follow the instructions.

1.6 Copyright

```
©
© OctaMED is copyright © 1991-1995 Teijo Kinnunen & Ray Burt-Frost.
© Worldwide distribution Copyrights owned by R. Burt-Frost (RBF Software).
©
© OctaMED V6.0 is NOT public domain or freely distributable. It is a
© copyrighted program, which is available only directly from RBF Software
© or officially registered/contracted companies licenced with RBF Software.
© You are not allowed to distribute/pass on OctaMED in any way. However as
© a registered purchaser you may take two backup copies for retention in
© case of corruption. These must be retained for your own, private use.
©
© If you intend to use OctaMED V6 (or V2,3,4,5) within Commercial Software
© or hardware, please note that as it is a fully copyrighted program, you
© are required by law to contact RBF Software for a licence and any person
© individual/Company found to be using this program for such a purpose
© without first having obtained a licence will be deemed to have broken
© the copyrighted usage of the program and solicitors will be instructed.
© The exception to this is the program titled "OctaMEDPlayer", which may
© be treated as Public Domain, this will allow enthusiasts to pass out any
© songs you've composed to others, without breaking any copyright laws.
©
© The OctaMEDPlayer and the player library may be freely used/distributed
© with non-commercial programs (PD/Shareware etc), you do not need
© permission from the owners to distribute them with your PD program/s.
© If you wish to make use of the source/library routines that are on
© disk number two, then please read the Copyright licence file.
©
© OctaMED is provided "as is". Every effort has been made to keep OctaMED
© as bug free as possible, but if there are bugs that may cause you to
© lose something, it is important that you note by loading and launching
© this program, you are agreeing to absolve the author or RBF Software
© from any liability and you are agreeing not to pursue any claim for
© such losses be they deemed civil or criminal.
©
©
```

Powerpacker.library is Copyright © 1991-1992 Nico François.

LH.library is Copyright © Olaf Barthel.

Hyper is Copyright © RBF Software

XPkgGuide is Copyright © Simon Dick

The WB and files, such as AmigaGuide, AmigaGuide.info and the amigaguide library are (c) Copyright Commodore-Amiga, Inc. All Rights Reserved. Reproduced and distributed by RBF Software under license from Commodore.

AMIGAGUIDE®, INSTALLER SOFTWARE IS PROVIDED "AS-IS" AND SUBJECT TO CHANGE; NO WARRANTIES ARE MADE. ALL USE IS AT YOUR OWN RISK. NO LIABILITY OR RESPONSIBILITY IS ASSUMED.

Note that the CBM copyright notice may alter soon, but we have been informed that they will remain applicable to the new owners of the Amiga.

1.7 About OctaMED & Thanks

This program has been entirely designed and programmed by Teijo Kinnunen.

The Copyrighted OctaMED.guide files have been written and updated by Ed Wiles, (based mainly on the documentation of older versions of OctaMED).

Note that these may not be reproduced without permission.

The icons for OctaMED/OctaMEDPlayer have been designed by Izrael Similä (Iz Productions). Thanks!

OctaMED has been pre-release-tested by Richard Bannister, Kevan Craft, Tony Horgan, Bjørn A. Lynne, Ed Wiles, Daniel Amor, Stephan Fuhrmann, Dean Murray and Paul Overraa Thank you! Also many thanks for the numerous suggestions sent in by users worldwide.

And last, but certainly not the least, thanks to Ray for suggesting and subsequently taking care of the world distribution of OctaMED!

1.8 Suppliers Licenced by RBF Software

Note that DevWare are no longer licenced to act as our N. American distributors as after having sold thousands of Dollars worth of our program in America, instead of sending us the agreed payments, they chose to steal the Royalties and plough it back into the company to attempt to keep themselves bouyant!!

The boss, Scot Pincus, has ignored our attempts to sort this out and matters are now in the hands of a debt recovery agency. So, if buying products from this Company, be aware of this fact!

****Update on the DevWare Saga**

Well, we have had no luck contacting the above person and according to one of his ex employees he has apparently pulled the plugs of all the phone numbers at his DevWare company and used the money, (some of that is ours as well), to apparently start up all over again calling himself NT Inc.
So, be carefull and may we suggest that you check them out first before placing an order, as if it IS being run by Scot Pincus you would be well advised to place any orders with great caution!!!

Finaly, please note that V6 can now be purchased from the well known (and trustworthy), Amiga Library Services. [Fred Fish]

Please contact ALS for price details.

RBF Software has now re-commenced selling Octamed directly in the UK and by cutting out the middle man and his "mark up" we are now able to offer V6 at a "massive" reduction in price....

UK orders: £25.00
outside UK: £30.00

Note that this is for the English language version 6 ONLY.

All EC and worldwide orders by Eurocheque, Giro or bank draught ONLY.
All UK orders by Cheque or postal order.

Payment made out to: RBF Software
and send to: 169, Dale Valley Road, Southampton, SO16 6QX, England

A full French language version is available from:

France-Festival-Distribution
3, Rue Anatole France, Fr 13220 Chateuaneuf-Les-Martigues. (33)
42761870

A full German language version is available from:

ABF Computer Gbr
Postfach 40 01 43 70401 Stuttgart. 07152/937904

So if you live in one of these countries, or would prefer a version in one of these languages, please contact them.

1.9 Contact Addresses

For any matters concerning distribution, sales, copyright, licencing, or such, you should contact the world copyright owners RBF Software:

RBF Software
169, Dale Valley Road
Hollybrook
Southampton
SO1 6QX
ENGLAND

+44 (0)1703 785680 This is an Answerphone/Fax line.

Copyright ©1991-1995 Teijo Kinnunen & Ray Burt-Frost (RBF Software).

We can also be reached on the net by e-mail:

rbfsoft@cix.compulink.co.uk

OR,

via the OctaMED User Support BBS on +44 (0)1703 703446

(this is the home of the OctaMED.User/MUG Group)

=====

For matters concerning the program itself, e.g. suggestions, ideas and bug reports, you can write to the author:

Teijo Kinnunen
Oksantie 19
FIN-86300 OULAINEN
FINLAND

e-mail: kinnunen@stekt.oulu.fi (preferred)

The author may not be able to reply individually to every letter received, but you are still very welcome to write and share your ideas and feelings. All suggestions/ideas will be considered.

Please remember to indicate the version number of OctaMED you are using. This is important if you are reporting bugs, the version number and its compilation date are displayed in the OctaMED "About" screen (select About from the Project menu).

=====

If you find any mistakes in or have any suggestions concerning the on-line help file, Ed, the main author, would love to hear from you!

Please write to:

Ed Wiles, 9 Kirkland Wynd, Lochvale, Dumfries, DG1 4ES, SCOTLAND.

NOTE TO BRITISH USERS: You may notice the odd American spelling in the help file. This is intended as an aid users living in countries where English isn't the first language (there's quite a few, you know ;'), since it's likely that American rather than English spellings will be familiar. (Anyway, who ever thought of putting a "u" in "color" ??-) The original Latin word didn't have a "u" in it, so ... ???!?!? :-D)

NOTE TO AMERICAN USERS: I've included as many American spellings as I know, but if I've got (sorry, gotten :) anything wrong, please tell me! (remember that the manual does not cover this new soundcard addition)

1.10 Future development

The 64ch OctaMED Soundstudio V1 is now on sale!!

- * 64 channels.
- * An improved/new notation editor.
- * Configurable and improved mixing routines.
- * Direct to disk recording.
- * 14bit without soundcard
- * And much more!!

A500+ or A2000 (using WB2.1)

A1200, (Blizzard compatible, 4mg advisable),
and of course A4000 or higher.

All readers with above specs can obtain a copy of Soundstudio for a truly low price by cutting out the coupon in the magazine and returning it along with your order, (no coupon, no deal).

Watch out for the new PC version in late 1997
