Chapter 1

in

1.1   main

```
*****************************************************************************
To AF, the best magazine for the best computer.  Ever.
*****************************************************************************
```

   Well, you said you wanted some icons, so here you are. They all use the

standard NewIcons palette, and, for those users without NewIcons installed,

will show up as your old MWB icons. However, if you add NewIcons to the C:

drawer on the CD and add a line such as:

   C:NewIcons

to your Assign Script, this will change the icons to the NewIcons look

(although I think the AFCD drawer will have to be closed and opened again).

```
*****************************************************************************
To Everyone Else, congratulations for buying a CD Drive.  Good aren't they?
*****************************************************************************
```

   I have tried to keep the Icons looking nice and 'seeable', but for those

who use TVs (like myself :-( ) some of the images might be a bit blurred.

If you want to take a good look at the Icons, I have included a picture,

AFIcons.iff, which is in Lo-res. Sorry about this, but the Icons do look

nice...

   Well, goodbye then. If you have any comments, feel free to write to :-
