1.2   Introduction

```
Welcome to MUILoad!

MUILoad loads the primary MUI libraries when run, thus reducing
the loading time of the first MUI program you start.

To get the most out of this program it should be put in one of
the startup-sequences, but it can also be used in your WBStartup
drawer.

MUILoad has been tested on:

A1200/030 50MHz 8Mb Fastmem+2Mb Chipmem OS3.1

Requirements:

MUI.

Features:

+ Small.
+ Annoyment reducing software. (my opinion :)
```

1.3 Installation

Copy to C: or another directory if you want to be irritating.

It should be placed somewhere after the assigns in the
startup-sequence. MUILoad never generates output.

C:MUILoad

That was an example line, all for your pleasure.
