Methods In Action originally began as the spring design project of Dave Mott and myself (Bruce Calder). During the summer of 1992, the ideas originally developed by the end of the academic year were expanded to increase the applications usefulness, friendliness, and educational value. I would like to thank Dave Mott for his dauntless effort towards pushing this project to a decent state during the school year. I would also like to thank Dr. Claude

Anderson for his ideas in overcoming the difficult hurdles in this first project of mine in Object Oriented C.

For more information about this and other applications created by Rose-Hulman developers, contact us at ifycsem@nextwork.rose-hulman.edu.
