5. Where to Go From Here

Introduction

If you've completed the tutorials in this book, you're no longer a novice in OpenStep development. You should be able to attempt an OpenStep application on your own, and should expect to carry it off successfully. However, there is much more for you to learn (or to learn in greater detail). There will probably be times when you'll need information or help. You might want to pursue a training course, you might want to order a NeXT product, or you might have questions you'll need answered, or problems you'll need resolved.

This section points you toward these sources of information and help. It also includes descriptions of tools, resources, and documentation frequently used in application development.

World Wide Web

NeXT's corporate home page is at: **http://www.next.com**.

From there you can navigate to summaries of products, such asWeb Objects$^®$, Enterprise Objects Framework$^®$, and D'OLE$^®$Ðand order the products on-line. You can learn about NeXT programs in education, consulting and technical support. You can also use the NeXTanswers document retrieval system. For Web Objects, you can download versions of the product, try out demonstration Web Objects applications, and access related documentation.
