Movingobjectstootherwindows;¬Moving objects to other windows

1   Select one or more objects.

2   Alternate-drag the objects to the other window or panel.

To move objects from one window or panel to another within the same nib file, hold down the Alternate key and drag them between windows. This action moves the objects if the windows are in the same nib file and copies them if they windows are in the different nib files.

_MovingOther.eps ¬

If the windows are in the same nib file and you want to copy rather than move the selected objects, you have two alternatives:

SquareBullet.eps ¬Copy the objects using the Copy command; click the other window or panel to activate it, and use the Paste command to copy the objects from the pasteboard.

SquareBullet.eps ¬Copy and paste the objects in one window, then Alternate-drag the duplicated objects to their new window or panel.
