Defined Types

NXRemoteException

DECLARED IN   remote/NXProxy.h

SYNOPSIS   typedef enum {
    NX_REMOTE_EXCEPTION_BASE,
    NX_couldntSendException,
    NX_couldntReceiveException,
    NX_couldntDecodeArgumentsException,
    NX_unknownMethodException,
    NX_objectInaccessibleException,
    NX_objectNotAvailableException,
    NX_remoteInternalException,
    NX_multithreadedRecursionDeadlockException,
    NX_destinationInvalid,
    NX_originatorInvalid,
    NX_sendTimedOut,
    NX_receiveTimedOut,
    NX_REMOTE_LAST_EXCEPTION
} **NXRemoteException**

DESCRIPTION   These are the exceptions that the Distributed Objects system might raise as a result of a remote message gone awry.

Symbolic Constants

Timeout Constants

DECLARED IN   remote/NXConnection.h

SYNOPSIS   NX_CONNECTION_DEFAULT_TIMEOUT

DESCRIPTION   This is the default timeout for a connection (currently, 15 seconds).
