Settingsystemdefineddocumenticons;¬Setting system-defined document icons

1   Bring up the Project Inspector and choose Project Attributes.

2   Click Add Row.

3   Type the file extension in the Name field of the Document Icons table.

In addition to listing the file types that the application can create, the Document Icons table should list the file types that the application can read but cannot create. For example, if you are creating a word processing application that can open RTF files and translate them into its own unique file type, you should list the RTF extension in this table.
