

Gray Levels

You can set the gray scale of the text and the Image Display Window background from the Main Parameters Panel. However, there are certain options and modes which override the text gray scale selection. The Outline, Fill, and Multiple Options and the Rose Mode each provide gray scale controls that take precedence over the Main Parameters Panel selection.

See *Gray Scale Controls* under *Controls* for more information about using TextArt's grayscale controllers.

TextArt: The Manual:

Gray Scale	p. 11
Outline	p. 24
Fill	p. 26
Multiple	p. 29
Rose	p. 18
