Image Display to Layout Board

There are several ways to copy an image from the TextArt Image Display Window to a Layout Board window.

 - Choose **Copy** (**command-c**) or **Copy Display** (**command-d**) from the Edit Menu; move to a Layout Board Window, and choose **Paste** (**command-v**)

 - **Double-click** or **command-click** on the Image Display Window. This will copy the image to the top Layout Board Window and make it the key window.

If you want an arbitrary section of the TextArt Image Display Window:

 -Click and **Drag** out a selection rectangle in the TextArt Image Display Window. Move to a Layout Board Window and **Paste**.

 -Shortcut: Holding the **Alternate** key while dragging a selection rectangle in the Image Display Window will automatically paste the selected rectangle to the top Layout Board Window, which will become the key window.
