Options

The five options, **Outline**, **Fill**, **Multiple**, **Skew**, and **Shadow**, affect the appearance of your text; you can apply any number of them to achieve different effects. See Help topics for the individual options for descriptions of the choices available for each one.

To choose an option:

Click on the appropriate checkbox in the Main Parameters Panel

or

Select the appropriate option from the Option menu under the Image Display menu.

or

Use the appropriate command key shortcut:

Outline:	**Command-1**
Fill:	**Command-2**
Multiple	**Command-3**
Skew:	**Command-4**
Shadow:	**Command-5**

If you want to remove all the options and return to the **Basic** mode, choose **None** from the Option menu under the Image menu (**command-0**). This will also reset the following Main Parameter controls to their default values:

Text Gray Level	Reset to Black
Background Gray Level	Reset to White
Letter spacing	Reset all amounts to 0
Rotation	Reset to 0

Vertical Scale	Reset to 100
Horizontal Scale	Reset to 100
Zoom	Reset to 1

The font and font size values will not be changed.
