TextArt Files

TextArt has two file formats: TextArt image (saved from the Image Display Window) and TextArt documents (saved from the Layout Board windows).

You can also save an image or a Layout Board as an Encapsulated PostScript file and a Layout Board as a TIFF file.

You can import EPS and TIFF files into Layout Board windows.

TextArt: The Manual:

Opening files: p. 65
Saving files: p. 66
