The Layout Board Inspector Panel

The Layout Board Inspector panel lets you change various attributes of graphic objects that you create in Layout Board windows. Use the Inspector panel to change:

     Line width
     Fill
     Gray scale
     Framing
     Arrows
     Line Cap
     Line Joint
     Size

To change these attributes, first select the object and then use the controls in the Inspector panel. To open the Inspector panel, choose Inspect (command-I) from the Layout menu or double-click or command-click on an object in a Layout Board window. (If you double-click or command-click on a TextArt image, the image will be copied to the Image Display Window.)

TextArt: The Manual:

Inspector Panel	p. 48	
Line width	p. 51	
Fill		p. 51
Gray scale	p. 51	
Frame		p. 52
Arrows		p. 54
Line Cap	p. 53	
Line Join	p. 53	
Size		p. 49
