

Installing Stone Software

These directories contain the application, sample files, tutorials in ".pkg" format for installation by the NEXTSTEP Installer.app:

;DataPhile/README.rtf;;¬ **DataPhile ±** this directory contains various DataPhile packages.

;Create/README.rtf;;¬ **Create ±** this directory has the various Create packages.

;3D_Reality/README.rtf;;¬ **3D_Reality ±** this directory has the various 3D Reality packages.

;Checksum/README.rtf;;¬ **Checksum ±** this directory has the CheckSum package.

Generic Installation Instructions:

1. Simply double-click the *.pkg* file in Workspace's File Viewer; This launches the NEXTSTEP Installer.app.

281919_paste.tiff ↵

2. Click on the Install button:

253396_paste.tiff ↵

3. The next panel will ask you where you want to install the program or auxilliary files:

In the case of an Application, you are given an option to remove unwanted types of software - this can save space on your harddisk, for example in this illustration, only Intel-based computer software will be installed:

paste.tiff ↗

Other types of packages which don't contain executable code presents a panel like this:

306368 paste.tiff ↗

Use the "Set..." button if you want to change the default location.

Then click the Install button. Sit back and enjoy the ride.

4. If you are installing Create, DataPhile or 3DReality, you can now launch the program, and register it with the provided license. If you haven't purchased a license - try it out in demo mode, and when you get hooked - give us a call to order your license with your MC/VISA.
