

Create Patterns

paste.eps ↵

Create Patterns are easy to make and easy to share.
Open the pattern palette in Create, select the .pattern files
in this directory, reactivate Create, and drop them into the
palette. If Create is installed, the .pattern file will look like:
Pattern.tiff ↵ - double-clicking it will also install it in Create.

Navigate:

```
;../README.rtf;;↵ Create Stuff  
;../../README.rtf;;↵ Stone Stuff  
;../../../README.rtf;;↵ Top Level
```
