

Create Stuff

Contents: *(click on the links for visual representations of files)*

;CreatelImages/README.rtf; **CreatelImages** - this directory has Create images, *.createImage* files, which can be dragged & dropped into Create documents, and added to the online Gallery within Create.

;Docs/README.rtf; **Docs** - this directory contains sample documents which you can use as templates for slide backgrounds and inspiration.

;EPS/README.rtf; **EPS** - this directory has some *.eps* files to drag and drop into a Create document. Try dropping one into Create's User PostScript window to try your hand at programming in PostScript!

;Manual/Online_Manual.rtf; **Manual** - this directory contains a

readme on the Online Create manual - a DataPhile database which gets launched from Create. To install, use the CR_Online_Manual.pkg.

;**../Stone_Packages/Create/README.rtf;Manual;**↵

;**Patterns/README.rtf;**↵ **Patterns** - this directory has some *.pattern* files which you can drag and drop into the Pattern Editor (or just double-click them to have them open in Create). They show how easy it is to create complex patterns with simple objects. Note that Patterns require Level 2 PostScript output devices.

;**TIFF/README.rtf;**↵ **TIFF** - this directory has some *.tiff* files to drag and drop into a Create document. Check out the Castles - ours and Himeji!

93_94_Stone_Brochure - this directory shows how we made the 93-94 brochure, using Create and 3D Reality!
