BIBLIOGRAPHY ABOUT NETWORK PROTOCOLS:
A LIST FOR BACKGROUND READING

DDN Network Information Center
SRI International, Room EJ291
333 Ravenswood Avenue
Menlo Park, CA 94025
(800) 235-3155 or (415) 859-3695
NIC@NIC.DDN.MIL

The attached bibliography of recent articles and books pertaining to TCP and IP, X.25, the Transport Protocol (TP-4), OSI and other standards, was compiled by the DDN Network Information Center (NIC) as a background reading list for vendors. The bibliography cites articles, mostly from the open literature, representing a variety of viewpoints. It has not been sanctioned by any government agency, nor does it contain references to the Requests for Comments (RFCs). The NIC does not provide copies of these articles because they are readily available in the open literature. The NIC has copies of the DDN Protocol Handbook, the RFC index, RFCs and the OSD (Office of the Secretary of Defense) directives pertaining to the DoD protocol suite.
