

The ideal word processor for the Macintosh Classic, LC, SE and PowerBook. Low memory and disk space requirements support formatting, page layout and word processing tools to create attractive, professional looking documents. Features include Column and Ruler settings; Graphics and Text Colour, to add visual impact to your documents, editing images on the screen, or even wrapping text around them; Stationary, for template documents; Open Latest, to display and retrieve your last six files; File Backup; Merge, for personalised mailshots; Endnotes, Footnotes, Headers and Footers; Speller, Thesaurus and Word Count. With the Conversion feature, you can easily import files from other WP programs.
