WordPerfect 2.1 for Macintosh is one of the first word processors to use Apple's newest technology. It supports System 7, and the new QuickTime architecture. And of course it still has WordPerfect's simple interface, uncomplicated menus, streamlined dialogue boxes and exceptional graphics handling. Not only can you edit, size, scale, and crop graphic images with ease, the tool palette and drawing commands let you create and edit graphics while in WordPerfect. Also, WordPerfect file compatibility goes from Mac to Apple to DOS to UNIX to VAX to DG to NeXT - even to Windows!

WordPerfect Pricing;
1 copy; £195.00. 3 copies; £550.00. 5 copies; £899.00. 10 copies; £1499.00. 25 copies; £2999.00.
