Health Care

John Ryan

Healthcare Industry Manager
Sun Microsystems, Inc.

Speakers

◆ Panelists

- ◆ **Tim Brinson**, Co-Chair CORBAmed, Protocol Systems, Inc.
- ◆ **Neil de Crescenzo**, IBM
- ◆ **Jim Hollister**, Oracle
- ◆ **Mickey Hollison**, Lotus
- ◆ **Kang Wang Ph.D.**, W3Health

◆ Moderator

- ◆ **John Ryan**, Healthcare Industry Manager, Sun Microsystems, Inc.

Health Care's Changing Dynamics

- ◆ Mergers, acquisitions and consolidation
- ◆ Hospital, payer and physician networks are competing for contracts
- ◆ Challenges: reduce cost, deliver quality care and provide access to services
 - ◆ Health Care Cybervision:
<http://www.hccybervision.com>

Health Care Information Technology Drivers

- ◆ Reimbursement maximization → Cost minimization
- ◆ Care maximization → Health optimization
- ◆ Financial/billing → Clinical
- ◆ Regulatory requirements
- ◆ Customer demand for information

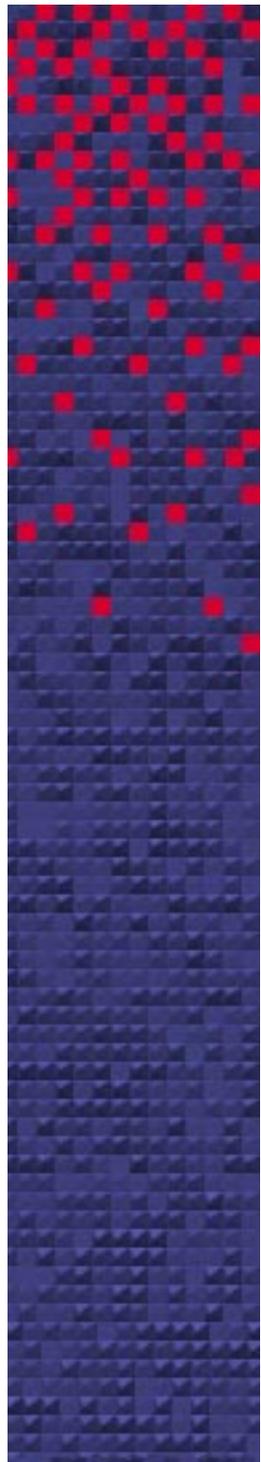

Health Care Information Technology Requirements

- ◆ Leverage legacy systems/assets
- ◆ Ubiquitous access to applications and data
- ◆ Flexibility, scalability and connectivity
- ◆ Security/confidentiality
- ◆ Incorporation of applications standards

Introducing: Java Healthcare Initiative

For information contact:
dub.dublin@sun.com, 713-964-7020
tim@Protocol.com, 503-526-4392
dsink@us.ibm.com, 919-254-3648

Tim Brinson
Protocol Systems, Inc.
co-Chair CORBAmed

[A Quick Overview]

- ◆ Protocol Systems, Inc.
- ◆ The healthcare IT problem
- ◆ The need for interoperability
- ◆ Standardization
- ◆ Longitudinal patient records
- ◆ Integrating Java and CORBA

Protocol™ Systems, Inc.

- ◆ That is not a wire ‘Protocol’
- ◆ The Flexible Monitoring™ company
- ◆ Small, portable vital signs monitors
- ◆ Unix central station
- ◆ CORBA/Java to the world

[The Healthcare IT Problem]

- ◆ Historically independent systems
- ◆ Conservative due to risks
- ◆ Proprietary lock-in was accepted
- ◆ Legacy systems

[The Need for Interoperability]

- ◆ Healthcare crisis ↘
- ◆ Consolidation ↘
- ◆ Distributed patient records ↘
- ◆ Need for integration ↘
- ◆ Use new technology

Standardization

- ◆ Standards Development Organizations

HL7, X.12, DICOM, CEN TC 251

- ◆ Consortia

OMG -> CORBAmed DTF

- ◆ Others

MS-HUG, AWG

- ◆ What about Java?

Longitudinal Patient Records

- ◆ Paper folder today
- ◆ Must be distributed
- ◆ ‘Write once, access anywhere’
- ◆ Maintain confidentiality

Integrating Java and CORBA

- ◆ Access from anywhere independent of:
Hardware, Operating System

→ Java

- ◆ Access data anywhere independent of:
Hardware, Operating System, Programming Language

→ CORBA

Neil Decrescenzo
Director
Global Healthcare Business Strategy
IBM

Jim Hollister
Senior Director Health Industries
Oracle

Applications in Healthcare

- ◆ The New Enterprise
- ◆ Application Opportunities
- ◆ Oracle's Healthcare Applications
- ◆ Moving to Java
- ◆ Sustaining Competitive Advantage

Healthcare's New Enterprise

- ◆ Consolidation, Consolidation
- ◆ Vertical and Horizontal Flavors
- ◆ Focus on Extending the Network
- ◆ Managing Resources Effectively
- ◆ Seeking New Opportunities
- ◆ It's a Zero Sum Game

[The IT Opportunity]

- ◆ Move from Transaction Based Cottage Industry to a Knowledge Based Complex Enterprise
- ◆ Industrial Strength Applications That Know No Limits
- ◆ An Architecture that Combines Operational, Financial, and Clinical Information

Oracle's Healthcare Applications

- ◆ General Accounting
- ◆ Budgeting, Modeling
- ◆ Operations Analysis
- ◆ Materials Management
- ◆ Fund Accounting
- ◆ Government Accounting
- ◆ OLAP with Express

Moving to Java

- ◆ Application Architecture
- ◆ Designer 2000
- ◆ Developer 2000
- ◆ Discoverer 2000
- ◆ Application Release 10.7

Sustaining Competitive Advantage

- ◆ Rapid Installation
- ◆ Transforming Business Operations
- ◆ Self Service Java Applets
- ◆ Timely and Relevant Information
- ◆ Staying Nimble
- ◆ Scaling to Fit Continued Consolidation

Use WEB and Java™ Technology for Clinical Information Integration

Kang Wang Ph.D.

W3Health

[The Problems]

- ◆ Heterogeneous application/DB
- ◆ Need common UI common medical record
- ◆ Need distributed access ability
- ◆ Common repositories may not always be the optimal strategy

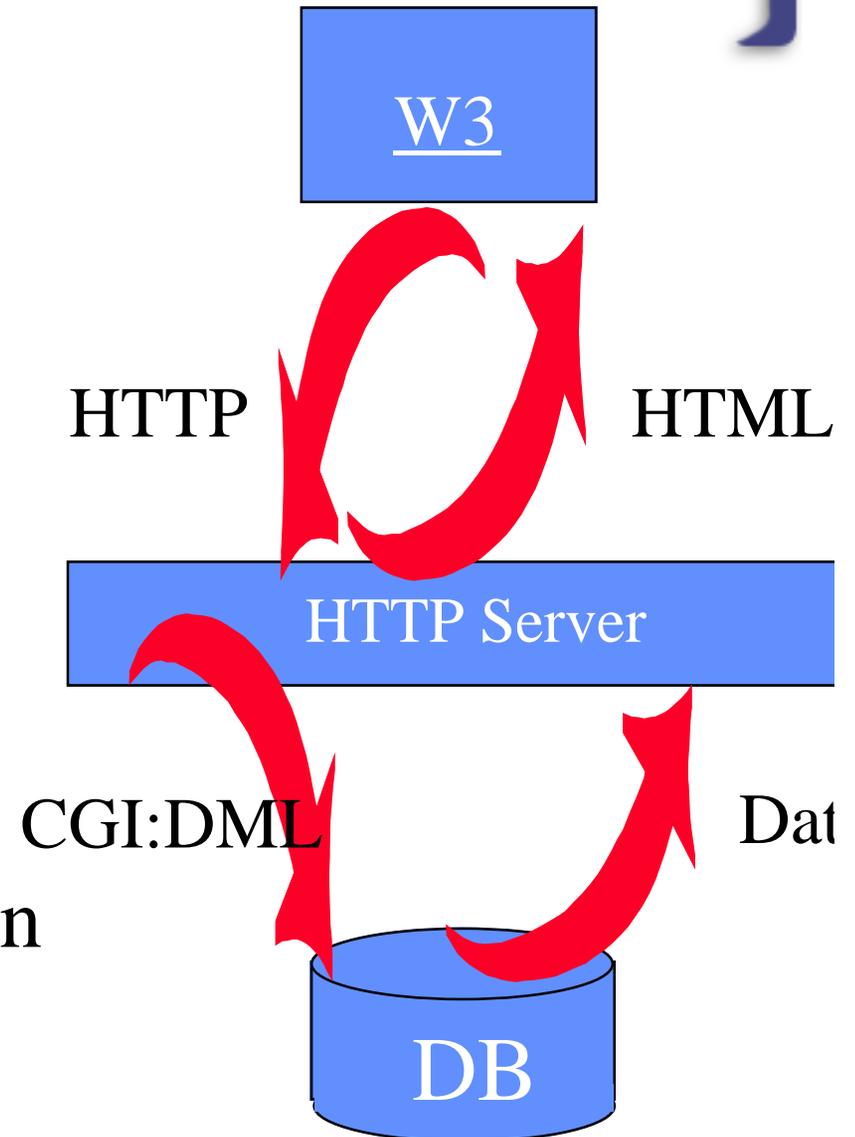

Solutions

- ◆ Keep “legacy” systems
- ◆ Unified architecture/CMR
- ◆ Internet/Java™: efficient, secured integration

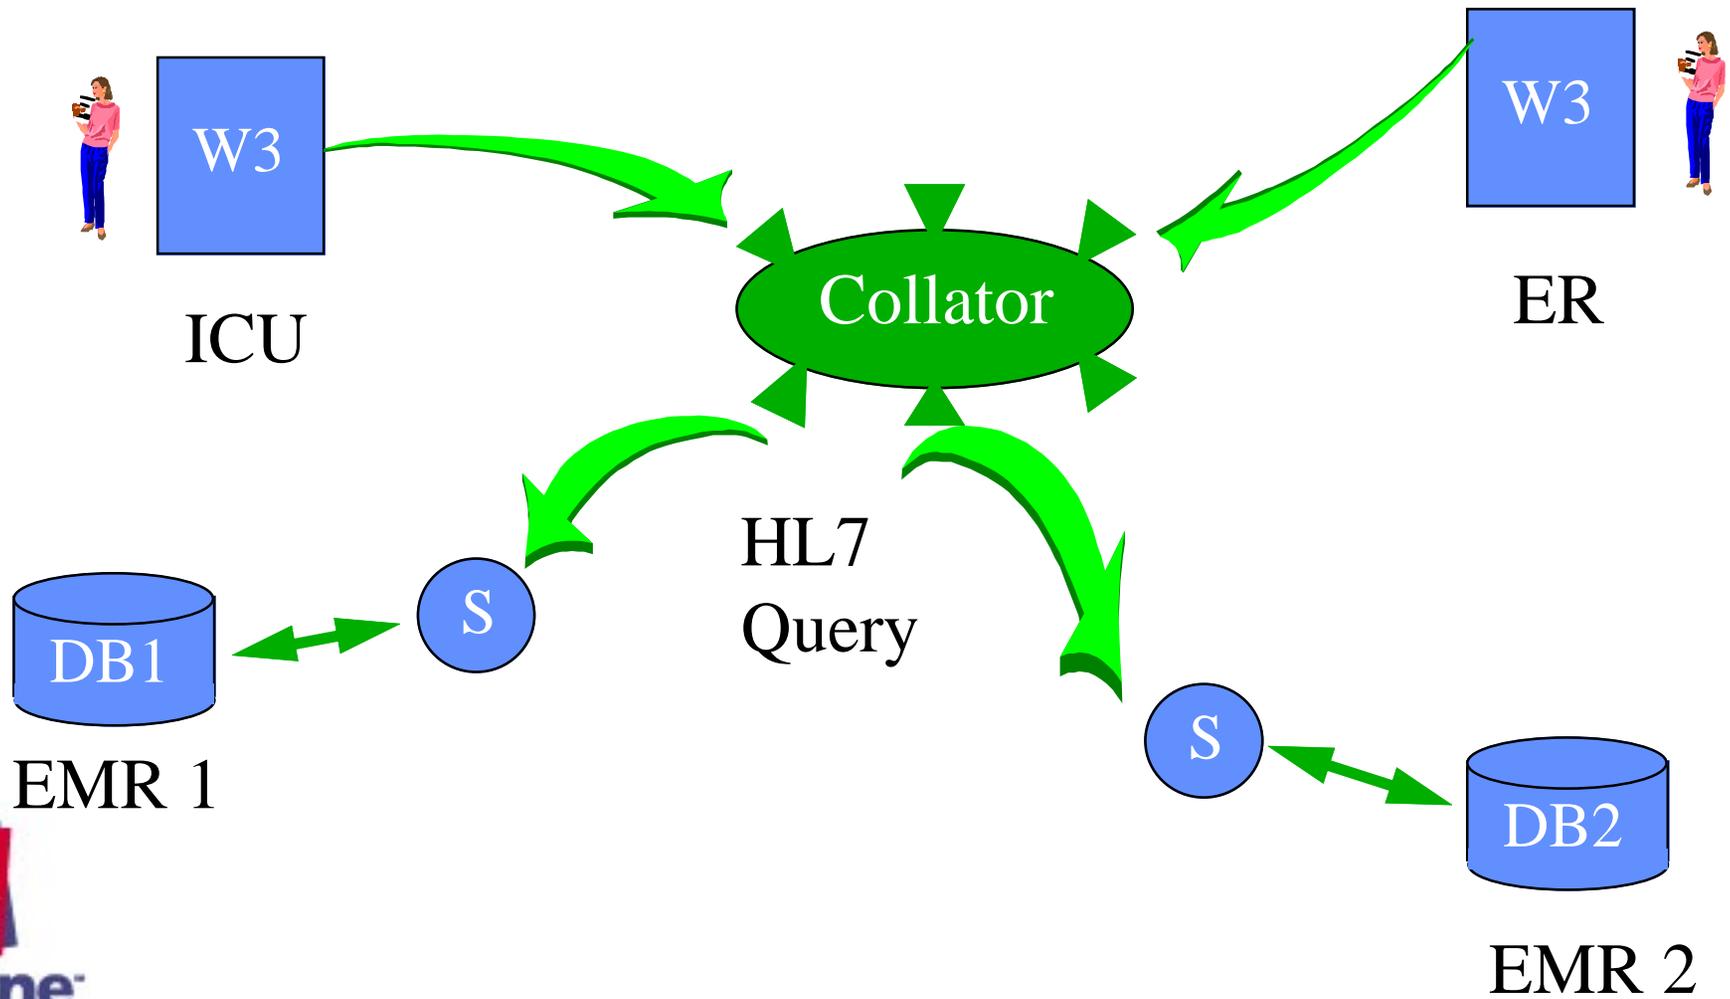

First-Generation Web Design

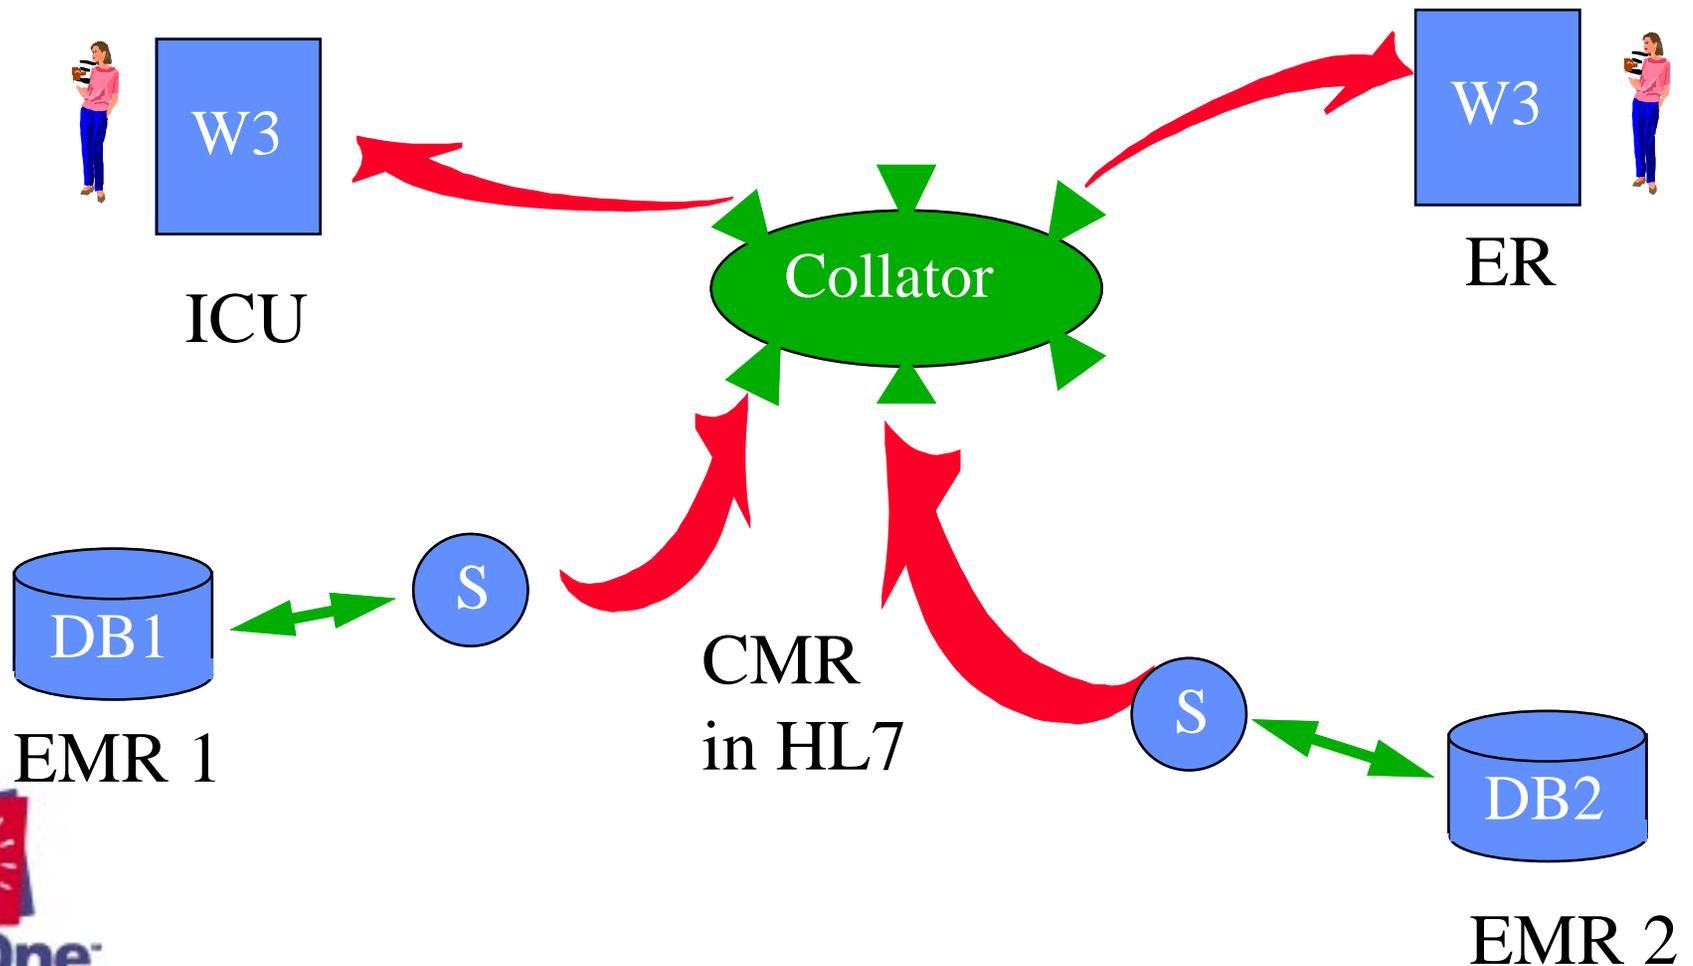

- ◆ Single data-model
 - ◆ Often implicit
 - ◆ Difficult to maintain
 - ◆ Unsuitable for unifying multiple heterogeneous systems
- ◆ Remote, multi-platform viewing
- ◆ Rapid development of view-only function

[Data Flow: Query]

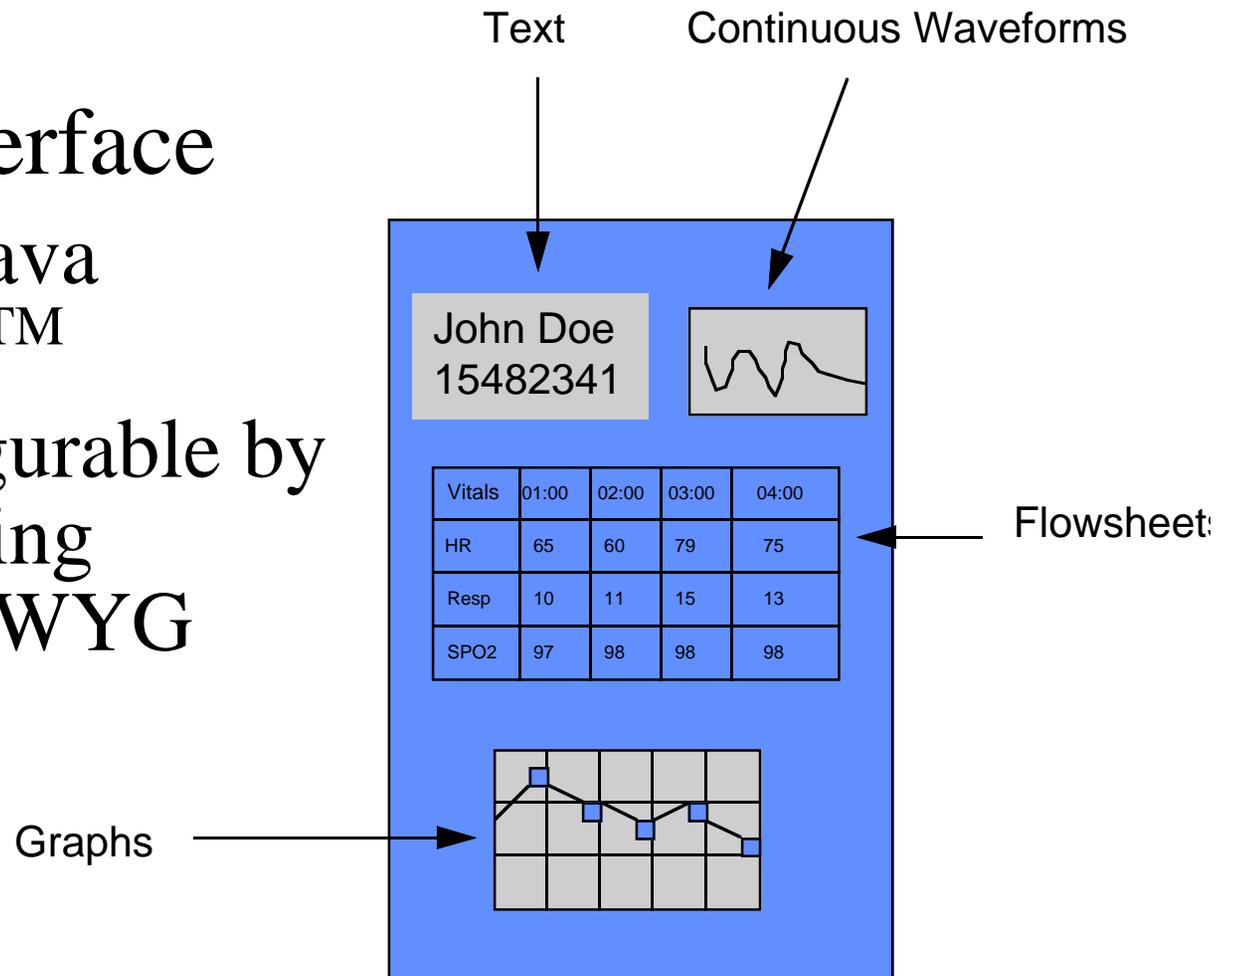

Data Flow: Response

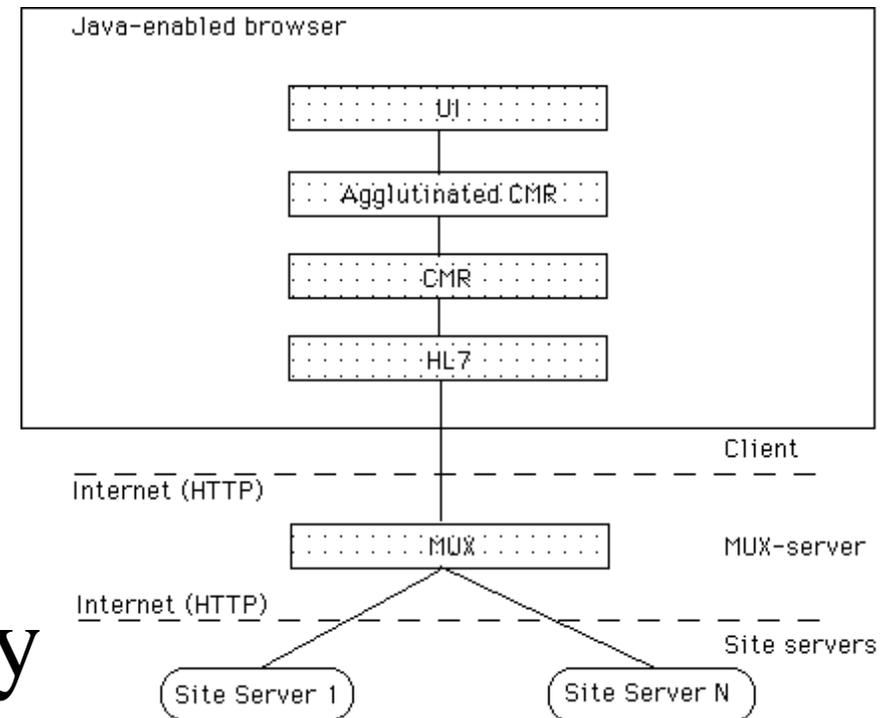

Modular Implementation

- ◆ User interface
 - ◆ Java/Java Beans™
 - ◆ Configurable by emerging WYSIWYG tools

Modular Implementation

- ◆ Modular
 - ◆ Communications
 - ◆ CMR
 - ◆ Configurable UI
- ◆ Portable
 - ◆ Java
- ◆ Inter-operability
 - ◆ JavaBean

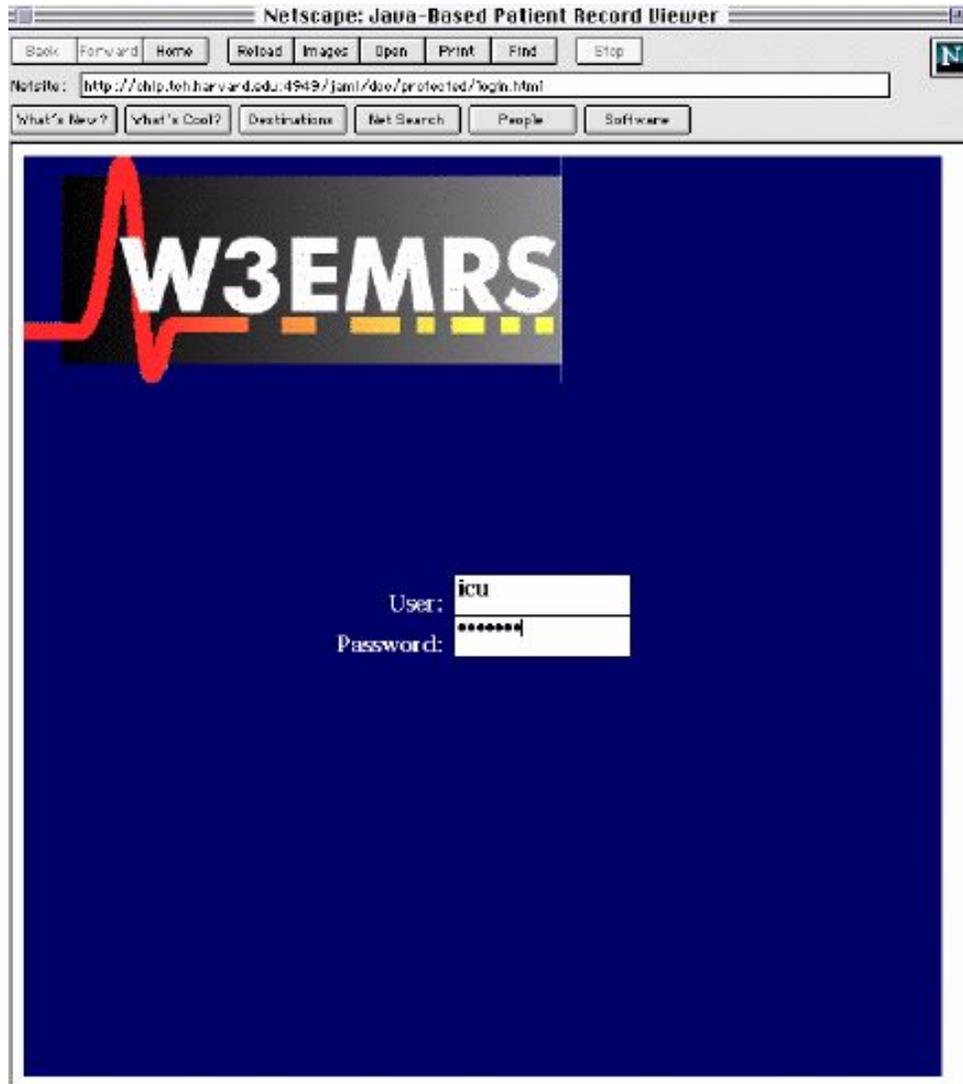

[Security and Confidentiality]

- ◆ Authentication
 - ◆ Client sites, agglutinators, site servers
- ◆ Password+one time password
- ◆ Patient consent
- ◆ Common confidentiality policy
