

Overview

Painter is designed to work hand-in-hand with your Internet web browser. With Painter an Internet connection and a web browser you can:

- Access the Painter home page by selecting, Fractal Design Online from the Help/Apple menu.
- Review online technical support by selecting Online Support from the Help/Balloon Help menu.
- Browse Internet resources by clicking "Browse Web" from any Open Library dialog.

Macintosh

The first time Painter launches your web browser it will search for an installed browser. This may take several minutes. If Painter does not find your preferred browser, you can manually select which browser Painter should use.

To configure Painter to use a specific browser, select `Edit/Preferences/Internet` from the menu bar. Painter will display an Open file dialog. Select your preferred Browser.

Windows

Painter calls the preferred browser that is identified in the Windows Registry. To change your preferred browser, you need to manually start your browser of choice. It should present a dialog that allows you to set it as the default browser.

Please refer to the documentation for your web browser for more information on setting it as a default browser.

Preferences

In Painter, the Internet Preferences

`Edit/Preferences/Internet` allow you to specify the default web page that Painter will display. This is the web page you will see when clicking "Browse Web" in the Load Library popup.

The factory default takes you to the Fractal Design Library pages. You will find a wealth of free resources available for download. Once you have downloaded and extracted a resource from the web, simply double-click the file and Painter will automatically load the resource.
