Chapter 1:

Installation	1
Installing Ray Dream Studio	1
Macintosh Installation	2
Windows Installation	3

Installation Troubleshooting	4
------------------------------	---

Chapter 2:

Ray Dream Studio 5 Overview	5
Introduction	5
Application Overview	6
What is a Scene?	6
Ray Dream Studio 5 Windows	6
Starting to Think in 3D	11

Chapter 3:

Animation in Ray Dream Studio	13
Animation Overview	13
The Animation Process	14
Animation Tools	14
Special Animation Features	15
Tweeners	15
Behaviors	16
Animating with the Modelers	16
Rotoscoping	16
Animating Deformers	16
Managing your Project	16
Storyboarding	16
Simplifying your Scenes	17
Rendering without Compression	17
Motion and Timing Principles	18

Chapter 4:

Ray Dream Studio 5 Basics	21
Overview	21
Learning about Ray Dream Studio 5 Files	22
Setting Up Ray Dream Studio 5	22

Launching Ray Dream Studio	22
Allocating Memory on a Macintosh	22
Selecting the Scratch Disk	23
Using Extensions with Ray Dream Studio 5	23
Using Plug-Ins with Ray Dream Studio	23
Setting Application Preferences	24
Setting up your Workspace	25
Setting up the Working box	26
Setting up the Grid	26
Customizing Toolbars	26
Creating a New Scene	27
Creating an Empty Scene	27
Using the Scene Wizard	27
Opening an Existing File	28
Placing Objects in your Scene	28
Using the Browser Palette	28
Using the Time Line Window	32
Importing 3D Objects	33
Working in a Scene	33
Navigating your Scene	33
Viewing your Scene	34
Editing your Scene's Contents	35
Undoing Operations	36
Saving and Closing	36

Chapter 5:

Tutorial	37
Welcome	37
Getting Started	38
Lesson 1: Setting up your Workspace	38
Arranging Objects in the Scene	39

Lesson 1: Adding Objects	40
Lesson 2: Positioning Objects	41
Lesson 3: Rotating Objects	43
Lesson 4: Aligning Objects	44
Lesson 5: Duplicating and Grouping	45
Modeling Objects	47
Lesson 1: Free Form Modeling	47
Lesson 2: Complex Free Form	
Modeling	52
Lesson 3: Mesh Form Modeling	57
Lesson 4: Deformers	60
Shading Objects	62
Lesson 1: Creating Shaders	62
Lesson 2: Applying Shaders	64
Setting up Lights	67
Lesson 1: Adding Lights	68
Lesson 2: Positioning Lights	70
Lesson 3: Lighting Effects	71
Setting up Cameras	72
Lesson 1: Adding Cameras	72
Lesson 2: Viewing your Scene from	
Different Cameras	74
Lesson 3: Positioning Cameras	75
Animating Objects	76
Lesson 1: Creating Key Frames	77
Lesson 2: Applying Tweeners	78
Lesson 3: Applying Behaviors	79
Animating Shapes	82
Lesson 1: Animating the Extrusion	
Path	82
Lesson 2: Animating the Mesh Form	
Modeler	85
Lesson 3: Animating Deformers	87
Animating Effects	89
Lesson 1: Rotoscoping	89
Lesson 2: Animating Shaders	90
Rendering	92
Lesson 1: Rendering an Image	92

Lesson 2: Rendering an Animation . .	94
Wrapping Up	94

Chapter 6:

Creating Objects	97
Modeling vs. Primitives	97
What are 3D Primitives?	98
Creating Geometric Primitives	98
Creating Environmental Primitives . . .	99
Creating Infinite Planes	104
Creating Text Objects	105
Creating Formula Objects	106
Creating Objects Using the	
Modeling Wizard	107

Chapter 7:

Free Form Modeling	109
Free Form Modeling	109
Free Form Modeling Concepts	110
How do you Choose a Modeling	
Technique?	111
The Free Form Modeling Window	112
Features of the Modeling Window . . .	113
Working in the Modeling Window	114
Working on the Drawing Plane	116
Drawing Tools	117
Precision Editing	122
Working with Cross Sections	125
Modeling with Multiple Cross Sections	
125	
Working with the sweep path	129
Drawing the sweep path in 3D	129
Cross Sections and the sweep path . .	131
Translation vs. Pipeline	131
Using the Extrusion Envelope	132
Understanding the Envelope	132
Editing the Envelope	134

Lathing	134
Lathing with the Extrusion Envelope . .	135
Lathing with a Circular sweep path	136

Chapter 8:

Mesh Form Modeling	137
Introducing the Mesh Form Modeler . . .	137
Mesh Form Modeling Concepts	138
Extruding and Sweeping	138
Lathing	139
Lofting	139
The Mesh Form Modeling Window	140
Features of the Modeling Window	141
The Drawing Plane	141
Setting Preferences for the Mesh	
Form Modeler	141
Working in the Mesh Form Modeling	
Window	142
Changing the Drawing Plane	142
Changing your Point of View	143
Selecting a Preview Mode	144
Using the Window Controls	144
Working on the Mesh Form Drawing Plane .	
144	
Mesh Form Modeler Arranging Tools . .	144
Mesh Form Modeler Drawing Tools	
147	
Setting up the Grid	150
Modifying the Last Action	150
Creating Polymesh Objects	151
Drawing with the Polyline Tool	151
Drawing with the Polymesh	
Primitive Tools	151
Duplicating Polymesh Objects	152
Specifying Object Properties	152
Working with Selections	153
Saving and Restoring Selections	153

Inverting the Current Selection	153
Hiding Selections	153
Working with Vertices	154
Adding and Removing Vertices	154
Linking and Unlinking Vertices	154
Moving Vertices and Edges	155
Working with Polymesh Objects	156
Aligning Polymesh Objects	157
Adding Thickness to an Object	157
Creating and Filling Holes in an Object	158
Smoothing and Sharpening Edges in an Object	158
Controlling the Number of Vertices and Edges Used to Describe an Object	159
Transforming Polymesh Objects and Selections	161
Moving an Object or Selection	161
Scaling an Object or Selection	162
Rotating an Object or Selection	163
Using Standard Modeling Techniques to Create Complex Polymesh Objects	164
Extruding and Sweeping Polygon and Polyline Cross Sections	164
Modeling with Polygon and Polyline Cross Sections	166
Lathing with Polygon and Polyline Profiles	166
Using Boolean Operations to Create Complex Polymesh Objects	167
Shading Polymesh Objects	169
Specifying an Object's Mapping Mode	169
Defining a Custom Mapping Mode for an Object	170

Chapter 9:

Deformers	171
Using Deformers	171
Applying Deformers	172
Using the Atomize Deformer	172
Using the Bend and Twist Deformer	173
Using the Black Hole Deformer	173
Using the Dissolve Deformer	174
Using the Explode Deformer	174
Using Formula Deformers	175
Using the Punch Deformer	175
Using the Shatter Deformer	176
Using the Spherical Morph Deformer	177
Using the Spike Deformer	177
Using the Stretch Deformer	178
Using the Warp Deformer	178
Using the Wave Deformer	179

Chapter 10:

Shading Objects	181
Applying Shaders	181
Shading Overview	182
Shaders	182
3D Paint	182
The Browser Palette	183
The Current Shader Editor	183
Shading an Entire Object	184
3D Paint	186
3D Paint Tools	186
The Brush Tool	187
Working with Paint Shapes	190
Layering: How Primer and Paint Shapes Interact	190
Advanced 3D Paint Topics	191
Editing Shading in the Properties Palette	191

Mapping Modes	193
Managing your Shaders	195
A Note on External Texture Maps	196

Chapter 11:

Creating Shaders	197
Why Create a Shader?	197
Shader Structure and Content	198
What is a Shader Tree	198
Composite Shaders vs. Global Mix Shaders	200
Shader Components	201
Basic Components	201
Operators	206
Functions	207
Shader Channels	213
Color	213
Highlight and Shininess	213
Bump	214
Reflection	215
Transparency	215
Refraction	216
Glow	216
Building and Editing Shaders	217
The Current Shader Editor	217

Chapter 12:

Arranging Objects	223
Overview	223
The Workspace	224
The Universe	224
The Arranging Tools	224
The Viewing Tools	224
The Working Box	225
Objects in the Scene	229
Selecting Objects	231
Arranging Objects	232

The Hot Point	233
Positioning Objects	234
Dragging Objects	235
Nudging Objects	236
Numerically Positioning Objects ..	237
Measuring and Setting the	
Distance of Objects	238
Resizing Objects	238
Free Resizing	239
Numerical Resizing	240
Orienting Objects	240
Free Rotating	241
Numerical Orienting	242
Mirroring an Object's Orientation	243
Special Orientation Features	243
Aiming Cameras and Lights	244
Aligning Duplicating Objects	244
Aligning an Object Relative to Another	244
Duplicating Objects	247
Changing the Object Symmetry ..	249
Other Features	249

Chapter 13:

Building a Scene	251
Overview	251
Building your Scene's Contents	252
Adding and Deleting Objects	252
Replacing Objects	252
Jumping into Objects	253
Building a Hierarchical Structure	254
Changing your View of the Hierarchy	254
Navigating the Hierarchy	255
Changing the Structure	256
Groups and Links	256
Grouping Objects	256
Linking Objects	259

The Links Browser	265
Working with Master Objects	266
Objects and Masters Tabs in the	
Hierarchy	266
Master Object Operations	267
The Objects Browser	268

Chapter 14:

Setting Lights & Cameras	269
Introduction	269
Lighting & Cameras	270
Lighting	270
Cameras	271
Setting Lights	271
Ambient Light	271
Creating a New Light Source	272
Setting Light Properties	272
Positioning and Aiming Spot Lights	276
Shadow Options	279
Using Gels	280
Using Cameras	285
The Camera's Field of View	285
Creating a New Camera	286
Positioning and Aiming Cameras	
in the Scene	287
Changing your Perspective	
on the Scene	289
Using the RealSpace Spherical Camera	292

Chapter 15:

Animating	295
Key Event Animation	295
Animatable Properties	296
The Fixed Animation Hierarchy ..	297
The Time Line Window	297
Hierarchy Area	298

Time Line Area	299
Time Axis	301
The Time Controller Toolbar	303
Previewing an Animation	304
Viewing Motion Paths	305
Defining Key Events	306
Editing the Time Line	306
Using Tweeners	309
About Tweeners	309
Applying the Tweener	310
Behaviors	314
Applying Behaviors	314
Inverse Kinematics	317
Physical Forces	318
Record Behaviors	326

Chapter 16:

Animating Techniques	327
Animation Techniques	327
Animating Object Shape	328
Free Form Modeler	328
Mesh Form Modeler	329
Particle and Volumetric Primitives	330
Animating with Deformers	332
Animating Motion	333
Translate versus Rotate	333
Duplicating Relative Motion	
with Groups	333
Cloaking an Object	334
Rotoscoping	334
Animating Shaders	335
Animating Shaders with the	
Global Mix and Mix Components ..	336
Rotoscoping in Non-Color	
Shader Channels	337

Chapter 17:	
Rendering	339
About Rendering	339
The Rendering Procedure	340
An Overview	340
Setting up to Render	341
Rendering Preferences for	
Individual Objects	341
Render Preferences	341
Scene Settings	342
Renderers	342
Render Effects	344
Output	360
Preset Render Settings	367
Starting a Rendering Job	368
Using the Batch Queue	368
Speeding up Rendering	370
Viewing Rendered Images	371
 Chapter 18:	
Post Production	373
Overview	373
Post-Production Applications	374
Compositing	374
Filtering Images	375
Animation Post Production	377
Printing Images	378
 Appendix A:	
Using Ray Dream Studio with	
other Applications	379
Introduction to the Work Flow	379
Working with 2D Programs	380
Importing Shapes from a 2D Art	
Program	380
Importing Images	380
Exporting Images	380
Working with Painter	380
Working with 3D Programs	381
Importing Objects	381
Exporting 3D Files	384
Using Ray Dream Studio with Detailer ..	387
Using Ray Dream Studio with Poser ...	388
 Appendix B:	
Glossary	389
Introduction	389
 Appendix C:	
Technical Tips	397
Introduction	397
Before You Call Technical Support	398
Macintosh	398
Windows	399
Set up	400
Memory	400
TSR Programs (Windows)	401
Modeling	402
Shading	402
Printing	403
Arranging	404
Lights and Cameras	405
Rendering	406
 Index	407
 Fractal Design License	
Agreement	421
 Fractal Design Ray Dream Studio	
Troubleshooting Worksheet	423
