

MATHEMATICS ADVICE

To make a mathematics quiz, enter formulas using an on-screen calculator.

When you take the quiz, you will see the formula and type in the correct answer.

Tips:

- The equations you write must be basic addition, subtraction, multiplication or division
- When you create the question, the PC will automatically compute the answer.
- When you take the quiz, you will be asked all the questions, so don't write more than you want to take.
