In 1990, we developed PhotoStyler, a sophisticated image processing program for graphics professionals. Aldus Corporation exclusively licensed the program from us in 1991. When Adobe Systems acquired Aldus in 1994, all trademarks and rights to PhotoStyler were sold.

In 1992, Ulead made a big splash in the retail market with ImagePals, an award winning image management tool that set the standard for others to follow. From there, Ulead expanded into the multimedia arena. Our first products were **HQ-9000** and **VideoStudio 1.0**. A short time later, **MediaStudio**, a complete multimedia tool kit for those interested in the exciting world of digital video, and **MorphStudio**, where editing and special effects meld for miraculous animations were released.

Now Ulead's complete family of products is sure to meet anyone's most general or specific needs.
