

## PowerCPU™

### Cool Processor Upgrades

TechWorks, the industry leader in Macintosh memory upgrades, now brings the power and performance of today's ultrafast processors to Power Macintosh, Power Computing and UMAX owners. Utilizing the latest 604e PowerPC™ processors, the PowerCPU™ cards deliver maximum performance at a fraction of the cost of a new computer. Bring your Macintosh or Mac clone up to speed today!

#### Features

- Powerful 604e PowerPC processor technology
- Delivers speeds up to 233 MHz and beyond
- Optimum performance using BSO (Bus Speed Optimizer)
- Plug & Play
- Installs in minutes
- No special software required
- Reliability ensured - 2 year warranty

#### TechWorks' PowerCPU180

180 MHz 604e Upgrade Card	Part Number	UPC Code
PowerCPU180 .....	12051-0001	747464800028
PowerCPU180-S .....	12054-0001	747464800059

#### TechWorks' PowerCPU200

200 MHz 604e Upgrade Card	Part Number	UPC Code
PowerCPU200 .....	12052-0001	747464800035
PowerCPU200-S .....	12055-0001	747464800066

#### TechWorks' PowerCPU233

233 MHz 604e Upgrade Card	Part Number	UPC Code
PowerCPU233 .....	12053-0001	747464800042
PowerCPU233-S .....	12056-0001	747464800073

Note: S denotes a short board version

### Compatibility Information\*

\*requires Mac OS 7.5.5

Manufacturer	Manufacturer	Models	Model Numbers
PowerCPU (All speeds)	Apple		7500, 8500, 9500, 9600
	Power Computing	PowerTower	166/180/180e/200e
		PowerTower	180/200/225
		PowerWave	120/132/150
	UMAX		S900, J700
PowerCPU-S (All speeds)	Power Computing	PowerBase	180/200/240
		PowerCenter	120/132/150/180
