1.1   CYCAS DEMO Help - Screen

```
Modifying the Cycas screen:

Starting CYCAS for the  first  time,  the  program  will
adapt  the  screenmode of your workbench. You can change
the screenmode you want to work in by pressing the right
mouse  button  (pull down  menus) and selecting the menu
GUI setup: After you have changed the screenmode of  the
CYCAS  screen you can adjust the following from the same
pull down menu.

Font:
You can change the screen font. Avoid using  large  font
sizes as they may not fit the user interface .

Screenmode:
Choose your preferred screenmode.

Palette:
You can alter the user interface colours.

-Original:
Reverts to the original CYCAS color setup.

Screen ratio:
Adapting the  screen  ratio  to  the  chosen  screen
resolution. Measure the horizontal and vertical distance
of the window in "cm" and enter  the  results  into  the
width-  and  depth  gadget.  If you leave the window the
screen ratio should be installed correctly.

Save:
```

Save the setup.

Save the setup.
