

Hewlett-Packard J2585A Adapter Card Setup

Use this dialog box to configure settings for the HP J2585A 10/100VG adapter card.

NOTE: When using the HP J2585A the Base I/O Address selected in this setup screen must match the address in the HPVGSET configuration program. You must also run HPVGSET and complete the card configuration in that program.

Base I/O Address.

From the list provided, select the base I/O address.

Press "OK" to accept the settings shown.

Press "Cancel" to exit without making any configuration changes.
