Hewlett-Packard J2573A Adapter Card Setup

Use this dialog box to configure settings for the HP J2573A 10/100VG adapter card.

NOTE: When using the HP J2573A all settings selected in this setup screen must match those selected in the HPVGSET configuration program. You must also run HPVGSET and complete the card configuration in that program.

Interrupt.

   From the list provided, select the interrupt channel.

Base I/O Address.

   From the list provided, select the base I/O address.

Press "OK" to accept the settings shown.

Press "Cancel" to exit without making any configuration changes.
