WordPerfect 5.1 Printer Test

WordPerfect 5.1 has many new features such as labels, spreadsheet imports, tab sets relative to margins, pull-down menus, mouse support, and more advanced macro and merge functions. WordPerfect 5.1 also supplements your printer's available characters by graphically printing over 1,500 international, legal, math, scientific, and typographical characters.

Equations can be created using WordPerfect's Equation feature.

The Tables feature in WordPerfect 5.1 creates, formats, and edits tables easily. The Tables Options[1] can be used to improve the appearance of the table.

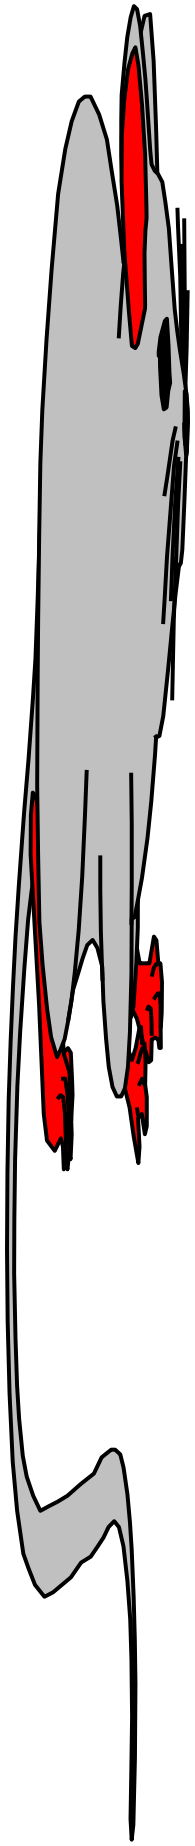
Print Attributes	567,845.56	Centered	Right Aligned
	67,887.47	Shadow	SMALL CAPS
	635,733.03	Redline	~~Strikeout~~

Fine, Small, Normal, Large, Very Large, Extra Large, Superscript, and Subscript are some of the printing features that have made **WordPerfect the world's number one word processor.**

You can create ruled and numbered paper by using User Boxes with numbers and graphic lines as borders. Text size and ***appearance*** may be changed without affecting the numbers or lines.

Integrating Text and Graphics

[1]Although only double and single lines are used in this table, many other border styles are available including dashed lines, dotted lines, thick lines, extra thick lines, and no lines at all.



Graphic images can be scaled, rotated, and moved. You can indicate the style of the border and include a caption.

The graphic image can be placed anywhere on the page, inserted in a line, tied to a paragraph, or included in a header or footer.
