There are several ways to install CyberMedia UnInstaller 4™. You can begin the installation process by inserting either UnInstaller disk in the disk drive and choosing Run from the taskbar or by double-clicking the CyberMedia UnInstaller 4 Setup.exe file in the Windows Explorer. Or, you can follow these step-by-step instructions.

To install from a CD

1. Insert the CyberMedia UnInstaller 4 CD in the CD-ROM drive and close the drive door.
If the Windows 95 AutoPlay feature is enabled, installation starts automatically after you close the drive and displays the CyberMedia UnInstaller 4 Setup screen.

If you don't see the CyberMedia Setup screen, click **Start**, point to **Run**, type **d:\setup** on the Windows 95 taskbar. Substitute the letter of your CD-ROM drive for **d**.

2. On the CyberMedia UnInstaller Setup screen, click Install UnInstaller.

CyberMedia UnInstaller Setup screen

3. UnInstaller displays a Welcome dialog box while it initializes the Setup program and click **Next**.
4. Read the Software License Agreement and click **Yes**.
5. In the Choose Destination Location dialog box, tell UnInstaller where you want the Setup program to install UnInstaller program files. The default location is C:\Program Files\UnInstaller. If you want a different location, click **Browse** to select another directory.
6. Click **Next** when you are finished.

During installation, you will be asked if you want to install a special version of Oil Change.. If you have an Internet connection, click yes. This particular version of Oil Change searches for the latest updates to the UnInstaller program and downloads them to your computer using your Internet connection. You use the Update feature by clicking the Update button on the UnInstaller main screen.

7. In the Setup Complete dialog box, select or clear the Display Release Notes and Run Installation Monitor at Startup check boxes and click **Finish**.

To install software from the CD

The CyberMedia UnInstaller CD contains software products in addition to the UnInstaller program. If you are installing under the Windows 95 operating system, you can install any of these programs when you install UnInstaller, or you can wait. If you are using the Windows NT operating system, you cannot install these additional software programs. If you decide to install a program later and are installing under the Windows 95 operating system, follow these steps.

8. Insert the CyberMedia UnInstaller 4 CD in the CD-ROM drive and close the door.
If the Windows 95 AutoPlay feature is enabled, installation starts automatically after you close the drive and displays the CyberMedia UnInstaller Setup screen.

If you don't see the CyberMedia Setup screen, click **Start**, point to **Run**, type **d:\setup**. Substitute the letter of your CD-ROM drive for **d**.

9. On the CyberMedia UnInstaller screen, click the top hat icon on the UnInstaller Setup screen.
10. On the next window, click the program that you want to install and follow the instructions.

Please note that the software products included on the CyberMedia UnInstaller 4 CD may change without notice.
