

DISNEY'S ALADDIN IN NASIRA'S REVENGE

London, September 2000, Sony Computer Entertainment Europe is once again pleased to announce its collaboration with Disney Interactive to produce Aladdin in Nasira's Revenge, an inspiring follow up to the hugely successful Tarzan which to date has sold close to 600,000 units across PAL markets.

The magic and adventure of Aladdin has been captured in Disney's interactive video game Aladdin in Nasira's Revenge for PSone. Starring all your favourite Aladdin characters, including Genie, mischievous Magic Carpet and mesmerising locations faithfully recreated from the film, each level of Aladdin is a joy to discover and explore.

Choose from three playable characters, Aladdin, Jasmine or even Abu, the monkey, to help you explore a free roaming 3D environment. Embark on an exciting adventure to protect Aladdin's home, the city of Agrabah, from the evil Jafar and his infamous sister, the sorceress Nasira.

Agrabah is a magical kingdom where the player will visit many wondrous locations, battle fire-breathing enemies, sword-throwers and spitting camels. Solve mysterious puzzles and hop onto the flying carpet in a high-speed race across the majestic city of Agrabah in your quest to overpower Nasira.

Inspired by Disney's 31st full-length feature film Aladdin, the third largest grossing film from Disney's stables. Players will be immersed in the spellbinding world of Disney with up to 40 hours of thrilling gameplay, with new adventures, new characters never seen before in Aladdin's world!
