

## Key Features

- **Laplink Internet**  
Makes simple and secure connections through firewalls and routers - without additional configuration or opening any special ports.
- **Laplink Remote**  
Allows a greater level of remote access for Windows XP Pro/Server 2000/Server 2003 computers using Desktop Integration with Remote Desktop.
- **Laplink Antivirus**  
Scans all files transferred between computers for the latest computer viruses.
- **Windows Authentication**  
Lets you easily add users and manage their privileges
- **USB 2.0 Cable**  
Enables the fastest file transfers ever (cable included free in the retail box).
- **Enhanced User Interface**  
Keeps common tasks accessible and hides tasks that cannot be performed with the new shortcut bar.

## The most complete remote access and control for PCs

Laplink Gold 12 is the fastest, easiest and most secure way to connect computers for complete remote access and remote control.

Laplink Gold 12 improves on an award-winning product by adding Internet connectivity, improved usability and superior security. This robust application allows you to access files, synchronize data, run applications, support co-workers and friends, maintain, and even reboot computers remotely. Connections can be established via USB cable or over the Internet.

## Transfers files faster than ever

Laplink's patented SpeedSync™ technology transmits only the updated portion of previously downloaded files. SmartXchange™ instantly synchronizes multiple folders and schedules automatic, unattended file transfers - without complex scripting.

## Eliminates complex configuration

Laplink Internet lets you reliably and securely connect to other Laplink Gold 12 computers through existing firewalls and proxy servers. The first 12 months of Laplink Internet is included free.

## Integrates with Remote Desktop

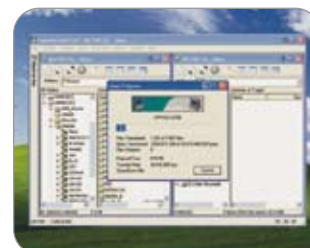

In partnership with Microsoft, Laplink has become the only independent software company to extend the functionality of Microsoft Remote Desktop, even on computers that have not activated this feature. Remote Desktop integration is available only for: Windows XP Professional, Server 2000/2003)

## Protects against viruses

To address the growing concern about virus attacks, Laplink has incorporated world-class antivirus protection into Laplink Gold 12. It includes alerts on new viruses, an online scanner, and virus removal tools. Laplink Antivirus also offers a choice of automatic updates or ad-hoc downloads. Laplink Antivirus is offered free for the first 12 months of service.

## Secures your data

Laplink Gold 12 provides full security options for accessing your computer. Choose Microsoft or Laplink authentication with folder-level security. Protect your data during transmissions with multi-level encryption (including Microsoft's CryptoAPI support). Prevent repeated attempts to guess your password with case - sensitive passwords and lockout protection.

## System Requirements

- Microsoft Windows 98 SE, Me, 2000, XP or Server 2003
- 133 MHz or higher Pentium-compatible CPU
- At least 64 megabytes (MB) of RAM; more memory generally improves responsiveness
- 30 MB of available hard disk space (for an installation)
- CD-ROM or DVD drive
- VGA or higher resolution monitor
- Keyboard and mouse required

File Transfer, Remote Control, Synchronization and More

laplink<sup>®</sup>  
connect your world

## For Consumers

### Platform compatibility

Work effortlessly across varied Windows environments with support for Windows 98, 2000, Me, XP/XP Pro and Server 2000/2003.

### Multiple connectivity options

Choose from a number of connection options including the Internet, TCP/IP or IPX networks, Dial-Up Networking, Laplink high-speed USB cables, Laplink serial cables, and Laplink parallel cables (Win 95/98/Me only).

### Comprehensive remote access

Access your computer's local and network drives with a file transfer connection. Send documents to a remote printer. Work through system freezes by rebooting the remote computer.

## For IT Professionals

### Increased productivity

Trim your interoffice, cross-town or cross-country travel by supporting users and managing remote servers without leaving your desk. Use remote control capabilities to operate, maintain, reconfigure and even reboot computers. Use the "Push Install" feature to deploy Laplink Gold 12 across the enterprise from a single location.

### Improved support

Enhance your troubleshooting abilities by using your Laplink connection for text or voice chat. Capture and retrieve snapshots and obtain system information on remote computers. Laplink Gold 12 is fully compatible with earlier versions of Laplink Gold, so you can support users running any version.

### Substantial savings

Simplify purchasing, minimize deployment costs and access a complete support and maintenance program with Laplink's Volume License Agreements (VLAs). Laplink offers VLAs for Laplink Gold and Laplink Gold Host that gives corporate, government, and academic organizations substantial discounts for purchasing Laplink software in quantity.

## Experience the freedom and power of these other Laplink products

### Laplink everywhere<sup>4</sup>

Laplink Everywhere web service provides complete access to your PC from anywhere in the world – through any firewalls or routers with no special configuration required.

Get complete access to files, email, contacts, calendars, and PC remote control capabilities.

### Laplink sharedirect<sup>™</sup>

A breakthrough in secure file sharing! ShareDirect transforms your PC into a simple, secure "private network" where you are the administrator with complete control. Share files of any size or type directly from your Windows File Manager. Integrated antivirus, 256-bit encryption, and full authentication safeguard your data and systems.

### Laplink filesender<sup>™</sup>

FileSender gives you the freedom to send large files anywhere, to anyone, through any firewall or router configuration.

It's as powerful as a File Transfer Protocol, but as simple to use as email.

You can send files in seconds, and recipients just click on a link to retrieve their virus-protected files from Laplink's relay servers.
