●● **"Undo" Feature**

Easily undo any transfer with this failsafe feature

●● **Included USB Cable**

A Laplink USB 1.1 is included in the retail box

Fast and foolproof migration of your settings and applications into a new PC

Moving to a new PC? Maybe you're not sure how to transfer your programs and documents to the new PC? Or if you've done it before, you've probably been putting off the move because it's such a hassle! PCmover will do all the hard work for you -- reliably and much faster than you could do it manually.

The main question is how to transfer the data, and PCmover supports all the options: If you're on a computer network then that's probably the best option; you can also use removable media such as CDs or DVDs or even an external hard drive which is a low-cost option these days. But if you buy the retail boxed version of PCmover you also get a special USB cable that you can connect between the old and new computers - provided they both support USB of course!

The PCmover wizard will automatically detect the files, settings, and applications required to replicate your old PC environment down to the very last detail. With a few mouse clicks, you can start enjoying your new PC with all your files, settings and applications available.

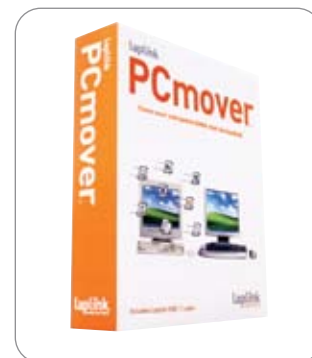

This powerful, intuitive migration tool is compatible with any version of Microsoft Windows. It can transfer all your existing applications, settings, data files, and even registry settings to another PC. And you don't need to tell PCmover where to find anything. It already knows exactly how to complete the move swiftly and accurately.

With the PCmover wizard, your transfer is accomplished with just a few clicks. When the transfer is complete, you are ready to use your new computer with all of its pre-installed software as well as your familiar applications, data files, and settings.

PCmover is ideal for copying your current PC configurations into a new PC, or for synchronizing configurations between all the PCs you use, such as desktops and notebooks.

"Having tried several other solutions in PC migration software, I have found Laplink's PCmover to offer the simplest and most cost-effective solution. Every time we do a PC migration with PCmover, we are always very impressed with how fast and easy the transfer process is."

– Sam Yanick, President, Sync Inc.

**System Requirements**

- Windows 95/98/NT 4.0/Me/2000/XP
- Intel or compatible 486DX or higher processor
- 16 MB RAM
- 4 MB of Hard disk space

Note:

PCmover is designed to move data from the one operating system to the same or newer operating systems. Laplink does not recommend using PCmover for migrations from newer Windows operating systems to older Windows operating systems.
