

All Systems Clear. Data Secured.

we know everything about viruses

Some companies put on a “big show” while others build great products. In any business sphere only those companies that are fully dedicated and focused on one thing achieve success. For us this means the battle against computer viruses. For many years we have worked on exposing, analyzing and neutralizing the virus threat. Along the way we have amassed a tremendous amount of experience and knowledge about viruses and the methods for dealing with them.

Company Profile

The Company Today

Kaspersky Labs is an international software-development company offering advanced products for protection against viruses, hackers and spam. Founded in 1997, Kaspersky Labs operates four offices in Russia, France, the United Kingdom, the United States (CA), and distributes its products in 60 countries via an extensive partner network. The company consists of 250 highly qualified specialists, among whom 9 hold MBA degrees, 15 PhD degrees, and 2 are members of the prestigious Computer Anti-virus Researchers Organization (CARO).

Unique Experience & Knowledge

For fourteen straight years we have waged battle against computer viruses, allowing us to gain unique knowledge and skills that together represent our most valuable asset. Today all users have free access to the world's most comprehensive virus information resource, the Kaspersky® Virus Encyclopedia (www.viruslist.com). The encyclopedia is updated weekly and contains detailed information about computer viruses from the moment they appear.

Our in-depth experience permits us to foresee developing virus trends and to beforehand ward off attacks. This unique virtue has become a fundamental part of Kaspersky Labs products and services and enables us to always stay one step ahead of the competition and to provide our customers with the very best protection.

Products

Kaspersky Labs, through hard work and dedication has become a technology leader in the development of virus defenses. Kaspersky Labs was the first to develop many technological standards in the anti-virus industry including full-scale solutions for Linux, Unix and NetWare, a second-generation heuristic analyzer designed to detect yet unknown viruses, effective defenses against polymorphic and macro viruses, anti-virus database micro updating and the ability to search for viruses in archived files.

Kaspersky Labs' fundamental product, Kaspersky® Anti-Virus, controls all virus penetration points on stand-alone computers, workstations, file servers, Web servers, e-mail systems, firewalls and handheld computers. Convenient management features give the opportunity to maximize the anti-virus defense of computers and corporate networks alike.

Clear affirmation of the high quality of Kaspersky Labs products is the numerous victories of Kaspersky® Anti-Virus in comparison tests conducted by renowned computer publications and independent research centers as well as positive reviews by leading information technology security experts. Additionally, many respected data protection software developers have chosen the Kaspersky® Anti-Virus kernel to drive their very own products, including Nokia ICD (USA), F-Secure (Finland), Aladdin (Israel), Sybari (USA), G Data (Germany), Deerfield (USA), Alt-N (USA) and Microworld (India).

Comprehensive Technology Security

Contemporary malicious programs are complex, multifunctional systems deeply integrated with the Internet. Traditional anti-virus methods are no longer enough to ensure reliable defense against external threats. Kaspersky Labs was therefore compelled to develop the personal firewall – Kaspersky® Anti-Hacker, and a unique spam filtration system designed for small and medium size business – Kaspersky® Anti-Spam. These products received the full benefit of our vast experience and expertise. The combined usage of our products achieves the maximum level of defense against virus code and other external data security threats.

Services

Kaspersky Labs customers get a wide spectrum of services guaranteeing the continuous trouble-free operation of our products and which precisely matches their specific requirements. Users get round-the-clock technical support and daily anti-virus database updates. Organizations and enterprises benefit from a unique set of services made available in connection with the design, implementation and maintenance of anti-virus systems.

Customers

Kaspersky Labs products enjoy popularity across all user groups. The company focuses on the data security and defense of small and medium size business, though among our clients are many large international government and commercial organizations such as La Poste (France), Airbus (EU), Stemcor (UK), Golden Telecom (Russia), Central Bank of Russia, National Security Bureau of Poland, Education Ministry of France, Foreign Ministry of Italy, BBC Worldwide (UK), Telecom Italia Mobile, France Telecom, and Reebok Australia.
