

Power Macintosh 6500 Series

Home, Small Business, and Creative Studio Editions

Features

Outstanding performance

- RISC-based PowerPC 603e processor running at 225, 250, 275, or 300 MHz
- Built-in 256K or 512K level 2 cache
- 32MB RAM minimum

Dazzling multimedia

- Hardware acceleration of 2-D and 3-D graphics, video capture, and QuickTime and MPEG-1 movie playback
- 24-bit color support on 14-, 15-, and 17-inch monitors (diagonal measurement)
- Built-in tray-loading 12x- or 24x-speed (maximum) CD-ROM drive
- 16-bit CD-quality stereo sound with SRS surround sound and integrated dual-mode subwoofer

Easy Internet access

- Internal data/voice/fax modem that supports data speeds up to 33.6 or 56 Kbps*
- Preinstalled software for quick, easy web browsing, e-mail send/receive, file transfer, audio and videoconferencing, and even personal web site creation

Expandability and flexibility

- Rugged minitower design with two industry-standard PCI expansion slots
- Built-in 100MB Zip drive on several models (models without Zip drive have a precabled SCSI expansion bay)
- Support of exciting options such as the Avid Cinema video-editing system and the Apple TV/FM Radio System**
- True plug-and-play installation of expansion cards, storage devices, scanners, printers, digital cameras, and other accessories

Valuable software

- Mac OS preinstalled (Mac OS 8 in some models)
- Apple Guide software for step-by-step help with basic system operation
- QuickTime multimedia software
- Macintosh PC Exchange software
- Free upgrade to Mac OS 8 for systems purchased after June 22, 1997 (U.S. \$9.95 charge for shipping and handling)
- Includes a broad range of software carefully chosen to meet the needs of home users, small businesses, and creative individuals***

*Data speeds up to 33.6 or 56 Kbps, fax speeds up to 14.4 Kbps. Actual download speeds vary with line conditions and your Internet service provider's modem capabilities. FCC regulations limit ISP transmission speeds to 53 Kbps in the United States.

**Avid Cinema and Apple TV/FM Radio System included on Creative Studio.

***Contents of software bundles vary by model.

The Apple Power Macintosh 6500 is the most powerful, expandable, and feature-rich Macintosh computer designed specifically for home, small business, and creative applications. The blazing speed of the PowerPC processor—combined with hardware acceleration of graphics and video—enables users to accomplish tasks previously possible only on expensive professional workstations.

Whether you are videoconferencing over the Internet, playing the hottest game titles, creating a video with a soundtrack you composed, or browsing the World Wide Web, the Power Macintosh 6500 will make your experience easy, snappy, and fun.

Breakthrough performance starts with being the world's first personal computer to run at up to 300 megahertz. Each model then adds at least 256K of level 2 cache, 32 megabytes of RAM, a 3-, 4-, or 6-gigabyte hard disk drive, and a 12x- or 24x-speed (maximum) CD-ROM drive. Some models even feature a built-in Zip drive for backing up or transporting your data on pocket-size 100-megabyte disks. A built-in 33.6- or 56-kilobit-per-second modem* makes exchanging e-mail, faxes, or voice mail, as well as surfing the Internet, a snap.

But Apple engineers didn't stop there: They tuned the entire system to handle the rich media types common on today's Internet and CD-ROMs, without sacrificing rock-solid stability and ease of use.

The advanced video/graphics subsystem speeds manipulation of complex 2-D documents through QuickDraw acceleration; enables immersive 3-D games and interactive 3-D modeling with QuickDraw 3D acceleration; and delivers full-screen, full-motion movie playback through QuickTime and MPEG acceleration.

Throw in awesome CD-quality audio from the integrated subwoofer and 24-bit color support on displays up to 17 inches, and you're ready to do virtually anything you want to do with a computer.

And to get you started, each model comes bundled with valuable software. The Home Editions include more than two dozen software titles carefully selected for family and home use. The Small Business Edition offers applications tailored to the needs of those running a small or home-based business. The Creative Studio includes award-winning hardware and software for creating, editing, and publishing your own videos, music, art, 3-D models and animations, photos, and web sites.

And when it comes time to expand your system, you can do so with a variety of Apple or third-party options easily installed in the minitower enclosure.

The Power Macintosh 6500 series: With the software and the hardware to carry you well into the 21st century, they're the Macintosh systems you've been waiting for.

Power Macintosh 6500 Series

Home, Small Business, and Creative Studio Editions

Ordering Information

All systems come with a PowerPC 603e processor, mouse, keyboard, and cables. Appropriate software for each edition is also included.

Power Macintosh 6500/225 Home Edition
Order No. M5611LL/A

Power Macintosh 6500/250 Home Edition
Order No. M6189LL/A

Power Macintosh 6500/275 Creative Studio
Order No. M5854LL/A

Power Macintosh 6500/275 Home Edition
Order No. M6191LL/A

Power Macintosh 6500/275 Small Business Edition
Order No. M6190LL/A

Power Macintosh 6500/300 Home Edition
Order No. M6192LL/A

Optional enhancements

Apple Video System

Order No. 2894LL/D
For video input (NTSC, PAL, and SECAM)

Avid Cinema Video Editing System

Order No. M4561LL/B
For video editing and output (NTSC and PAL); requires Apple Video System

Apple TV/FM Radio System

Order No. M4586LL/A
For playing TV and FM radio stations on the computer; requires Apple Video System

**Data speeds up to 33.6 or 56 Kbps, fax speeds up to 14.4 Kbps. Actual download speeds vary with line conditions and your Internet service provider's modem capabilities. FCC regulations limit ISP transmission speeds to 53 Kbps in the United States.*

***May differ based on configuration.*

Technical Specifications

Microprocessor

- PowerPC 603e processor running at 225, 250, 275, or 300 MHz (with 32K internal cache)
- 32 integer registers and 32 floating-point registers
- 256K or 512K level 2 cache

Memory

- Comes with 32MB, 48MB, or 64MB of EDO RAM
- Supports up to 128MB via 2 DIMM slots
- Uses 168-pin, noncomposite, 60-nanosecond or faster EDO DIMMs (1K or 2K refresh, 5 volt)

Disk drives

- Internal 3GB, 4GB, or 6GB IDE hard disk drive
- Internal 1.4MB Apple SuperDrive floppy disk drive — Reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- Internal 12x- or 24x-speed (maximum) CD-ROM drive
- Internal 100MB Zip drive (on some models only)

Modem

- Built-in 33.6/56-Kbps modem*
- Voice-mail, caller ID, and speakerphone capabilities
- Built-in error correction and compression (MNP4, V.42, MNP5, V.42bis)

Interfaces

- Two PCI expansion slots (require 7-inch PCI 2.0-compliant cards that include a Mac OS driver)
- PCI-based communications slot (used by modem)
- SCSI port for connecting as many as six external SCSI devices (five on models with Zip drive)
- Precabled 5.25-inch SCSI expansion bay (used by Zip drive on models that include it)
- Apple Desktop Bus port for input devices
- Two serial ports (RS-232/RS-422); one used by modem
- Video-input slot for optional Apple Video System card (included on Creative Studio)

- Expansion bay for optional Apple TV/FM Radio System (included on Creative Studio)
- Infrared receiver for remote control (provided with Apple TV/FM Radio System)

Electrical requirements

- Line voltage: 100 to 125 or 200 to 240 volts AC
- Frequency: 47 to 63 Hz
- Power: 220 W maximum (continuous)
- Energy-saving sleep mode

Size and weight

- Height: 16 in. (40.6 cm)
- Width: 7.8 in. (19.8 cm)
- Depth: 16.9 in. (42.8 cm)
- Weight: 44.5 lb. (20.2 kg)**

Operating environment

- Operating temperature: 50° to 104° F (10° to 40° C)
- Storage temperature: -40° to 116° F (-40° to 47° C)
- Relative humidity: 5% to 95%, noncondensing
- Maximum altitude: 10,000 ft. (3,048 m)

Audio

- 16-bit, CD-quality stereo input/output ports
- SRS 3-D surround sound enhancement
- Integrated dual-mode subwoofer
- Front headphone jack and volume control

Display support

- 2MB of SGRAM video memory
- 24-bit color for display of up to 16 million colors at resolutions up to 800 by 600 pixels on monitors up to 17 inches (diagonal measurement)
- 16-bit color for display of up to 32,768 colors at resolutions up to 1,152 by 870 pixels on monitors up to 21 inches (diagonal measurement)
- Refresh rates up to 85 Hz

Graphics and multimedia

- ATI 3D RAGE II 64-bit multimedia and graphics accelerator chip for faster, smoother video capture; acceleration of QuickDraw (2-D) and QuickDraw 3D graphics and QuickTime and MPEG-1 movie playback
