Spot #1 50:10 version

Revolutionary" :50/:10

AVO: It doesn't look like any desktop computer you've ever seen before. A sleek, translucent, blue-and-white minitower. And, with all of the groundbreaking technology inside, it outperforms every other desktop computer, too.

It's the completely reinvented Power Macintosh G3. Now raising eyebrows at a dealer near you.

Every new Power Mac G3 has a Pentium-crushing PowerPC G3 processor. The fastest built-in graphics accelerator of any desktop computer. Built-in FireWire, for working with high-quality digital video. Built-in high-speed Ethernet for fast networking. Built-in USB, so adding new devices is as easy as plugging them in.

And a simple side door that gives you fast access to every part inside.

If you're a graphics professional, a 3-D gamer or just a connoisseur of quickness, we've got your computer. The Power Macintosh G3 is the most powerful, most expandable, most revolutionary Mac ever built.

Spot #2 50:10 version

Yosemite Radio

"Reinvented" :50/:10

AVO: What could possibly follow the original Power Macintosh G3... the most popular Mac in history? How about a new Power Macintosh G3 – completely reinvented.

The 1999 version is about speed, speed and more speed. Every model has a Pentium-crushing PowerPC G3 processor to run the most demanding applications. The fastest built-in graphics accelerator of any personal computer. Built-in FireWire, for working with digital video. Built-in USB, for easy expandability.

And it's all encased in a sleek, translucent minitower that's as revolutionary as the technology inside.

Come see the most powerful, most expandable Macintosh ever built. With a new family of flat-panel and CRT displays designed to match it perfectly.

It's the new Power Macintosh G3. Completely reinvented.
