

## Cygsoft LDAP Browser 2.0

Cygsoft has developed a feature rich and robust LDAP browser, which can browse through LDAP database trees. The Cygsoft LDAP Browser is a window-based application, which provides a user-friendly interface to directory information. It enables users to access data quickly and efficiently, thus saving time and increasing productivity.

Cygsoft's LDAP browser displays the directory information in a tree structure. It provides easy-to-use pop-up menus, and a graphic indicator to show progress in loading data, together with detailed error messages. Directory managers can easily modify the contents of their LDAP databases. The browser also supports customizable views.

TABLE TITLE
