 Video Effects  
 for After Effects™ 3.0

# An After Effects™ User's Dream Come True... 20 Unique Plug-ins for One Low Price!

### DE StarField

Simulates a high speed flight through a field of stars. Complete control over speed, streaks, color, number of stars, twist amount, and much more. Very convincing!

### DE FogBank

Creates a very realistic moving bank of Fog or Smoke. Full control over 3 separate layers, including opacity, brightness, speed, shape and more. Instant San Francisco!

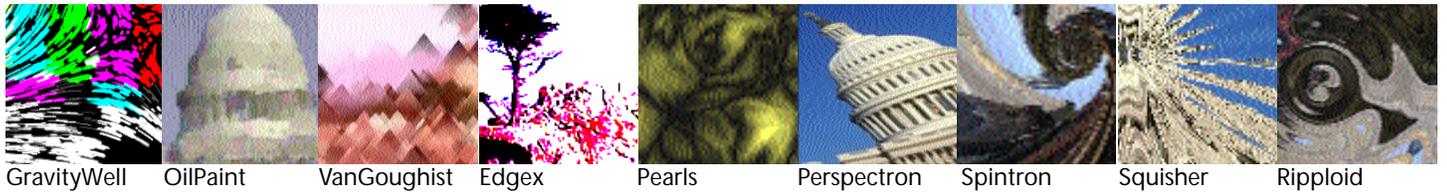

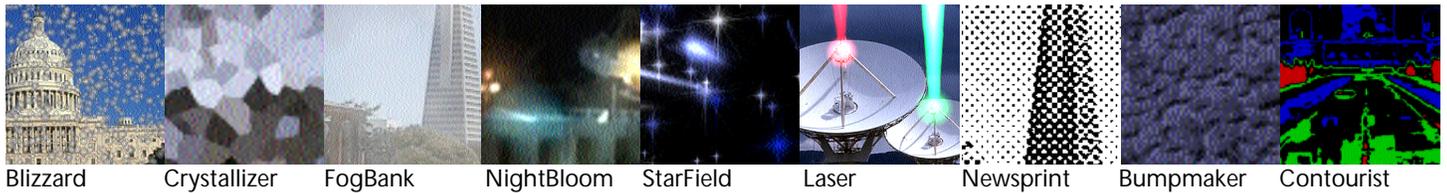

### DE VanGoughist

Generates a hand-painted look. Choice of 15 brush styles, and full control over size, amount of brushing and interaction with the alpha channels. Very organic look. Great for textures!

- Mac Today Editors Choice Award 1996
- DV Magazine Award of Excellence 1997
- MacUser Eddy Finalist 1996 Best New Multimedia Utility

## Product Description

Berserk NT is a package of 20 all-new filters for Digital Video! The CD-ROM is loaded with sample movies, sample projects, tips and techniques, free textures and special offers from TextureFarm and ArtBeats, cool shareware, and demo software from popular multimedia companies like Equilibrium. Berserk requires After Effects 3.0 or higher, Windows NT 4.0 and an Intel Chipset.

You can create animated textures, moving patterns, painterly looks and simulate three-dimensional effects like flying through star fields and drifting banks of fog. All parameters are animatable over time, so you have full control of the look of the effect. Each effect also has a blend parameter, so you can easily control the strength of the effect. All effects have been optimized for the Intel Pentium chip in the latest Windows NT computers. All effects have full anti-aliasing, resolution support and are ready for productive use.

## Effect Descriptions

### \* Natural Effects

DE Blizzard	Generates an intense winter snow storm.
DE Crystallizer	Creates a crystalline look from any image or movie.
DE FogBank	Simulates a rolling bank of fog or smoke. Looks very realistic.
DE NightBloom	Renders lens flares from light sources in night scenes.
DE StarField	Produce a unique, realistic flight through a field of colored stars.
DE Laser	Create all kinds of laser blasts and bright explosions.
DE Newsprint	Generate animated half-toned images. Create wild transitions.

### \* Organic Effects

DE BumpMaker	Quickly create highly textured backgrounds for type or backdrops.
DE Contourist	Produce "Predator" type VR-displays, with full control over the look.
DE GravityWell	Render wild animated, vortex-ish images. Very unique look.
DE OilPaint	Simulates the look of an oil painting. Animated painted look.
DE VanGoughist	Creates a very organic, painterly image with many options.
DE StillNoise	Renders noise that does not change over time. Very useful tool.
DE Edgex	Creates a unique posterization of the image with full control.
DE Pearls	Renders a beautiful, moving image that looks like satin cloth.

### \* Distortion Effects

DE Perspectron	Creates an unprecedented distorted look.
DE Ripploid	Produce watery and splashy distortions with full control.
DE Spintron	A unique twisty distortion. Great for transitions.
DE Squisher	Creates a special wavy warp.
DE CycloWarp	An alternative to the "Ripple" type warps.
