Product Description

Aurorix 2 NT (pronounced "ah-roar-icks") is a port of the wildly popular Aurorix2 filter package. This version addresses all the mis-comings of the first product. It now supports full anti-aliasing, resolution independence, full support for alpha channels, more para-meters, larger variation of ranges for parameters, CD-ROM based multimedia docs, special offers, free stuff and a whole lot more!

With 26 filters, you can create animated textures, 3D Effects, Lighting effects, weird distortions and a lot more. All parameters are ani-matable over time, so you have full control of the look of the effect. All effects have been optimized for the Intel Pentium in the latest NT Desktop computers. All effects have sample projects and are ready for productive use. Tons of fun to use and combine!
