

Shortcuts

The following table lists various special shortcuts you may find useful when working with GoLive CyberStudio.

Layout

	+			Command-dragging from selected text or any object defines a new link to a destination in the Project window or another document window.
	+			Command-dragging a color field in an Inspector window allows you to drag the color.
	+			Option-clicking with subsequent drag & drop copies text and links within a page.
	+			Control-clicking a link jumps to the link's destination. The cursor assumes the shape of a hand.
				The cursor control keys move a selected item across the layout grid, stopping before the item being moved can overlap other items. (Most items can be selected by clicking at the top.)
	+			While the Option-Key is pressed, the cursor control keys move the selected item across the layout grid pixel per pixel.

Text

	+		+	 or 	Moves the cursor to the next word to the left or right.
	+	 or 			Moves the cursor to the beginning or end of the current line.
	+	 or 			Extends or reduces the current selection.
	+				Inserts a line break instead of a <P> tag.
	+				Generates a list item without a bullet or number.

Generates a list item with extra wide line spacing.

Project

Command-clicking an item in the Project window shows the file in the Finder.

Control-clicking an item in the Project window shows the Finder Info window.

Toolbar

Clicking the Link button formats the current selection as a link. To select the destination for that link, use the Link Inspector.

Clicking the Remove Link button removes the link from the current selection.

Clicking the Hot Help button toggles Hot Help on and off. Hot Help displays helpful information on the button below the current cursor location.

Clicking the Link Warning button toggles the display of broken links on and off.

Table

Command-dragging adds cells and rows to the table.

Control-dragging resizes the table interactively, showing its content.

The Asterisk key on the numeric keypad adds a column at the current insertion point.

The Plus key on the numeric keypad adds a row below the current row.

The Delete key deletes the current column.

Shift-Delete deletes the current row.

	+		Shift-Right Arrow spans columns, joining the current cell with the cell to the right.
	+		Shift-Down Arrow spans rows, joining the current cell with the cell below.
	+		Shift-Left Arrow reduces column span, splitting the current cell back up again.
	+		Shift-Up Arrow reduces row span, splitting the current row back up again.
			Tab moves the text cursor to the next cell to the right.
	+		Shift-Tab moves the text cursor to the next cell to the left.
	+		Control-Tab switches from text entry to cell selection mode.
			Return switches from cell selection to text entry mode.
