

# Japanese Language Kit

## Japanese Language Kit Features

### Solutions

- Create documents and presentations in both Japanese and English, or Japanese and other languages supported by your system
- Produce promotional materials, foreign language textbooks, bilingual educational materials and more
- Insert Japanese text into letters, presentations, spreadsheets and other documents
- Boost language learning by allowing you to use interactive practice drills and other learning tools

### Ease of use

- Fast, simple installation
- Enables you to easily create, edit and print Japanese
- Comes with an input guide which includes instructions in Japanese and English

### Compatibility

- Runs applications that have been localised for Japanese, including WordPerfect, Persuasion, FileMaker Pro and Lotus 1-2-3
- Recommended for all QuickDraw™ printers; also works with PostScript compatible printers

### Flexibility

- Comes with two Kanji TrueType fonts, HonMincho and MaruGothic
- Lets you display, edit and print files created using KanjiTalk, the Japanese version of the Macintosh operating system

The Apple Japanese Language Kit contains everything you need to easily add Japanese to your documents. The kit can be used with your Apple™ Macintosh™ computer to run Japanese applications and include Japanese text in letters, presentations and reports. You can even work with files created using KanjiTalk™, the Japanese version of the Macintosh operating system.

Whether you're a desktop publisher or business professional, you can use the Language Kit to develop Japanese language materials such as brochures, posters, business cards, presentations and restaurant menus. Students and teachers can use it to run interactive Japanese language programs and produce compelling term papers in Japanese. Although the Japanese Language Kit does not translate text, it does let you easily input, edit and print in Japanese.

The Japanese Language Kit works as an extension to your system software and allows you to run Japanese applications. Because the Language Kit uses the operating system you already

have, there is no need to store an additional system on your hard disk. The Japanese Language Kit also contains Kotoeri, the same easy-to-use input method that is included with KanjiTalk 7.

Almost every major software program has a version that has been localised for Japanese. All you need to run them is the Japanese Language Kit and System 7.1 or later. You can even use non-localised programs, such as Nisus 3.4, that take advantage of WorldScript™, the new software technology from Apple. WorldScript, introduced with System 7.1, simplifies the way in which a single operating system can support multiple languages.

The Japanese Language Kit comes with two Kanji TrueType™ fonts, which produce high quality output from any Macintosh compatible printer. Documentation is provided in both Japanese and English, and you can type using either the roman or the kana keyboard layout. These features make the Language Kit easy to use, whether you're a native speaker or just learning Japanese.

# Japanese Language Kit

## Ordering Information

### Japanese Language Kit

- Japanese Language Kit on fourteen 1.4MB floppy disks
- WorldScript II system extension
- Japanese Language Kit Installation and User's Guide
- Macintosh Japanese Input Method Guide

The Japanese Language Kit is available for volume-licensing through the ClarisPlus programme. Contact your distributor for details.

## Technical Specifications

### Compatible applications

- The Japanese Language Kit can be used with a variety of Japanese localised applications. They include:
  - Acta 7 1.03J
  - Canvas 3.0J
  - EgWord 4.2J
  - FileMaker Pro J 1.0v2
  - FreeHand 3.1J
  - GreatWorks J
  - HyperCard 2.1J
  - Illustrator 3.2J
  - Lotus 1-2-3 1.1J
  - MacDraw Pro 1.5v1
  - MacWord 2.0T2J
  - MacWrite II 1.1v2J
  - PageMaker 4.0J
  - Persuasion 2.0J
  - PhotoShop 2.01J
  - Premiere 1.01J
  - PrePrint 1.0J
  - QuarkXPress 2.04J
  - SoloWriter 1.3J
  - SuperPaint 3.0J
  - WordPerfect 2.2J

- The Japanese Language Kit can be used with many non-localised programs that employ Apple WorldScript software technology. These programs include:
  - AllPage 1.82
  - AllScript 1.81
  - Nisus 3.4
  - WinText 2.7
  - WordPerfect 2.1

*Note: Apple has tested only a limited number of applications; these lists are not intended to be comprehensive. Many non-localised applications that do not employ WorldScript software technology may provide limited functionality and allow input of Japanese characters.*

### Printers supported

- Recommended: QuickDraw printers, including the Apple StyleWriter™ line, the Apple Personal LaserWriter™ line and the ImageWriter™ line.
- PostScript™ compatible printers, including Personal LaserWriter LS printers and Personal LaserWriter NTR printers. (Although PostScript printers can produce Japanese, performance may vary.)

### System requirements

- Apple Macintosh computer with at least 5MB of RAM
- Hard disk with at least 20MB of RAM available
- Apple SuperDrive™ floppy disk drive
- Apple Macintosh System 7.1 or later
- An application that is Japanese localised or that uses WorldScript software technology
