

Chinese Language Kit

Chinese Language Kit Features

Solutions

- Create documents and presentations in both Chinese and English, or Chinese and other languages supported by your system
- Produce promotional materials, foreign language textbooks, bilingual educational materials and more
- Insert Chinese text into letters, presentations, spreadsheets and other documents
- Boost language learning by using interactive practice drills and other learning tools

Ease of use

- Fast, simple installation
- Enables you to easily create, edit and print Chinese
- Comes with an input guide which includes instructions in Chinese and English

Compatibility

- Runs applications that have been localised, including WordPerfect, Persuasion, FileMaker™ Pro and Lotus 1-2-3
- Recommended for all QuickDraw™ printers; also works with PostScript® compatible printers

Flexibility

- Comes with TrueType fonts: LiSung for traditional and FangSong for simplified
- Allows you to use simplified Chinese characters, traditional characters or both
- Provides a choice of input methods: Pingin, Zhuyin, Langjie and others

The Apple Chinese Language Kit contains everything you need to easily add Chinese to your documents. The kit can be used with your Apple™ Macintosh™ computer to run Chinese applications and include Chinese text in letters, presentations and reports.

Whether you're a desktop publisher or business professional, you can use the Language Kit to develop Chinese language materials such as brochures, posters, business cards, presentations and restaurant menus. Students and teachers can use it to run interactive Chinese language programs and produce compelling term papers in Chinese. Although the Chinese Language Kit does not translate text, it does let you easily input, edit and print in Chinese.

The Chinese Language Kit works as an extension to your system software and allows you to run Chinese applications. The Language Kit uses the operating system you already have, so

there is no need to store an additional system on your hard disk. The Chinese Language Kit also contains simplified and traditional characters, as well as a wide choice of input methods.

Many major software programs have a version that has been localised for use in Chinese speaking countries. All you need to run them is the Chinese Language Kit and System 7.1 or later. You can even use non-localised programs, such as Nisus 3.4, that take advantage of WorldScript™, the new Apple software technology. WorldScript, introduced with System 7.1, simplifies the way in which a single operating system can support multiple languages.

The Chinese Language Kit comes with several TrueType™ fonts, which produce high quality output from any Macintosh compatible printer. Documentation is provided in both Chinese and English, making the Language Kit easy to use, whether you're a native speaker or just learning Chinese.

Chinese Language Kit

Ordering Information

Chinese Language Kit

- Chinese Language Kit on thirteen 1.4 MB floppy disks
- WorldScript II system extension
- Chinese Language Kit Installation and User's Guide
- Macintosh Chinese Input Method Guide (simplified)
- Macintosh Chinese Input Method Guide (traditional)
- CD-ROM with additional fonts

Technical Specifications

Compatible applications

- The Chinese Language Kit can be used with a variety of Chinese localised applications. They include:
 - Acta 7 1.03
 - Canvas 3.0
 - Eg Word 4.2
 - FileMaker Pro 1.0v2
 - FreeHand 3.1
 - GreatWorks
 - HyperCard 2.1
 - Illustrator 3.2
 - Lotus 1-2-3 1.1
 - MacDraw Pro 1.5v1
 - MacWord 2.0T2
 - MacWrite II 1.1v2
 - PageMaker 4.0
 - Persuasion 2.0
 - PhotoShop 2.01
 - Premiere 1.01
 - PrePrint 1.0
 - QuarkXPress 2.04
 - SoloWriter 1.3
 - SuperPaint 3.0
 - WordPerfect 2.2

- The Chinese Language Kit can be used with many non-localised programs that employ Apple WorldScript software technology. These programs include:
 - AllPage 1.82
 - AllScript 1.81
 - Nisus 3.4
 - WinText 2.7
 - WordPerfect 2.1

Note: Apple has tested only a limited number of applications; these lists are not intended to be comprehensive. Many non-localised applications that do not employ WorldScript software technology may provide limited functionality and allow input of Chinese characters.

Printers supported

- Recommended: QuickDraw™ printers, including the Apple StyleWriter™, the Apple Personal LaserWriter™ range and the ImageWriter™ II
- PostScript compatible printers, including Personal LaserWriter NTR printers and other LaserWriter printers. (Although PostScript printers can produce Chinese, performance may vary.)

System requirements

- Apple Macintosh computer with at least 5 MB of RAM (5 MB recommended for multiple applications)
- Hard disk with at least 20 MB of space available
- Apple SuperDrive™ floppy disk drive
- Apple Macintosh System 7.1 or later
- An application that is Chinese localised or that uses WorldScript software technology

Sample fonts

TrueType outlines can be displayed and printed in any type size or shape without distortion
